DEFINITIONS AND ABBREVIATIONS

Constitution of the Republic of Kosovo

Article 45 - Freedom of Election and Participation

> *1. Every citizen of the Republic of Kosovo who has reached the age of eighteen, even if on the day of elections, has the right to elect and be elected, unless this right is limited by a court decision.*
>
> *2. The vote is personal, equal, free and secret.*
>
> *3. State institutions support the possibility of every person to participate in public activities and everyone's right to democratically influence decisions of public bodies.*

Voter turnout - The percentage of voters registered in the Final Voters List and the By Mail voters List who cast their vote at the polling station and outside the polling station (conditionally, by mail, and through voting with special needs).

Regular Polling Station - Location where only voters registered on the Final Voters List at that polling station can cast their vote. The preliminary data on Election Day present the turnout of voters at regular polling stations.

Dual Polling Station - Location where voters registered on the Final Voters List of that polling station as well as voters who vote conditionally can vote. In each polling station, the last polling station, in addition to being a regular polling station, also serves as a dual polling station to enable conditional voting.

Regular voting - Casting a vote at the polling station where the voter is on the Final Voters List.

Conditional Voting – Service that allows voters to vote conditionally, in case they do not find their name on the Final Voters List at the polling station where they go to vote.

By mail voting - Service that enables citizens of Kosovo living abroad to vote by mail if they meet the criteria of legal capacity. This process consists of two periods: 1. The application period to register as a voter outside Kosovo and 2. The period to vote by mail for voters who register during the first phase.

Special needs voting - CEC service that enables the voting of persons with disabilities, hospitalized, in prisons, and other categories who cannot vote at a regular polling station. These people are enabled to vote through mobile teams.

METHODOLOGY

This comprehensive document is the first of its kind, as it provides detailed data for more than a decade, during which nine electoral processes took place. The data analyzed in this document refer to five electoral processes for the Assembly of Kosovo (2010; 2014; 2017; 2019 and 2021) and four local electoral processes for the Municipal Assembly (2009; 2013; 2017 and 2021).

Trend analysis is based on quantitative methods. The data included in the analysis were collected from the results database from the Count and Results Center (CRC). Specifically, the data was obtained from the Final Voters List (FVL), where all voters who voted as regular are registered. In addition, the registration of all voters who voted conditionaly and special needs voters, as well as the registration of all voters who voted by mail, is done through the Voting Service of the CEC. All this data forms the basis of the trend analysis.

In parts 1, 2, 3 and 4, only the data from regular voting in polling stations, on the day of the elections, were analyzed. These four parts do not include the data of conditional voting, voting of persons with special needs and voting from outside Kosovo. The data from these processes are analyzed in part 5 of this document.

Within these two types, analyzes were made based on the type of elections, making comparisons within the type of elections. During the comparison of trends within the type of elections, an analysis was made based on these categories of trends: *General election trends; Electoral trends according to municipalities; Electoral trends by gender; and Electoral trends by age groups.*

The age groups are divided as follows: 1) 18-21 years old, which includes voters who vote for the first time, 2) 22-25 years old as voters who have had the opportunity to vote at least twice, 3) 26-40 years old as well as 4) 41-64 years old, voters of economically active age, 5) 65-99 years old, retired voters, and 6) voters over 100 years old.

In the first part of this document, the general election trends in the Republic of Kosovo, during the period 2009 - 2021, are presented. These trends are presented in detail for both types of elections that are part of the analysis and for each municipality. The percentages of participation in the elections, for each municipality and during each election process, were derived by presenting the number of registered voters for each municipality and by proportioning it to the number of voters who voted.

In the second part of the analysis "Who votes more: men or women?" a large number of data on the Elections for the Assembly of Kosovo and Local Elections for Municipal Assemblies have been presented. Turnout trends by gender include only voters who cast ballots at regular polling stations relative to registered voters by gender. Thus, the percentages of participation in elections are derived by dividing the number of voters of one gender who voted by the number of voters of that gender who are registered. For example, in the 2009 Local Elections, the number of male voters registered in the Final Voters List was 807,011 and of them 372,551 or 46.16% voted, while the number of female voters registered in the Final Voters List was 756,730 and of them 283,694 or 37.49% voted. From this, we can conclude that registered male voters voted more than registered female voters did in the 2009 Local Elections. This is how the detailed data for each municipality and each electoral process, of both levels of elections, were extracted.

In the third part of "Electoral Trends..." the participation in the Assembly and Local Elections by age groups and by gender was analyzed. First, the general data on the number of registered voters according to each age group and according to both genders and their participation in the voting were presented. The turnout percentage for each gender and each age group was derived by dividing the number of registered voters of

one gender by the number of voters who voted of the same gender. From this, we have the detailed data on what percentage of registered male or female voters voted in an election process.

In the fourth part of this document, the electoral data in urban and rural areas are analyzed. At the beginning of this chapter, the general data is presented, while following it, the data of seven large municipalities in the Republic of Kosovo are analyzed: Gjakova, Gjilan, South Mitrovica, Peja, Prishtina, Prizren and Ferizaj. Even in this part, the same way of deriving the percentage of participation in the elections was followed. Therefore, first, the data of registered voters for each area (urban/rural) is presented and this number is proportional to the number of registered voters. For example, in the urban area (Local Elections 2009) of the municipality of Gjakova, the number of registered voters was 47,384 and of them 23,597 or 49.80% voted, while in the rural area the number of registered voters, was 44,482 and of them 18,363 or 41.28 voted. %. Based on this method of extracting the percentage of participation in the elections, we can conclude that in the Local Elections of 2009, in the urban area of the municipality of Gjakova, the turnout was higher.

In the fifth, last part, the data that are not part of regular voting are reflected: conditional voting that is possible in a certain, double polling station, in each polling station; voting of persons with special needs that takes place outside polling stations, at certain addresses, and data from early voting by mail for voters who register in advance.

EXECUTIVE SUMMARY

The analysis of the trends of participation in the Elections for the Kosovo Assembly and in the Local Elections for Municipal Assemblies that were organized in the Republic of Kosovo during the period 2009 - 2021 is a quantitative analysis of the data that the Central Election Commission possesses. The publication of this document can serve researchers, political subjects, media, etc., in their work.

I.   Based on the data of the election processes, the general trends show that there has been a continuous increase in the number of registered voters, with the exception of 2021 (cleaning of the voting list and removal of persons who only possessed UNMIK identification documents from voting list). Also, referring to general data (regular voting at polling stations, conditional voting, voting of persons with special needs and voting by mail) we can conclude that the highest percentage of participation in the 2009-2021 election processes is registered in the 2021 Assembly Elections (47.68%), while the highest percentage of participation in the Local Elections was registered in 2013 (46.72%).

II. Based on the data from the final voters lists (2009, 2010; 2014; 2017; 2019; 2021), in each of the electoral processes organized during this period, men constitute the largest number of voters in our country. In addition, participation in voting is higher among men. This does not apply only to the Local Elections of 2013 when the highest female voter turnout in the history of elections in Kosovo was recorded. This participation, in the same election process, was significantly higher even in relation to men for 37,559 female voters. The number of men who voted the most in an election process during this period was recorded in the Kosovo Assembly Elections 2021 (50.66%).

III. The analysis of voter turnout, on Election Day in polling stations and by age group, reflects interesting data. The 18-21 age group, which includes voters voting for the first time in an election process, has the highest percentage of voting participation. In the 2013 Local Elections, this percentage reached 56.11%, when out of 157,397 registered voters from this age group, 88,311 of them voted. A high percentage of participation in this age group was also registered in the 2021 Assembly Elections (53%). Even the other age group, 41-64 years old, which has the largest number of citizens with the right to vote, has high participation results. Lower participation in elections is observed in other age groups. The percentage of participation in voting, in polling stations, in the age group of 22-25 years has never reached 50 percent in any of the nine electoral processes, in the age groups of 26-40 years and 65-99 years presented the lowest percentages of participation in the election processes in our country. In most cases, this percentage is around 35%. At the end of this part, the age group > 100 years old has the smallest number of registered voters and their participation in voting. Only in the 2009 Local Elections, 9.06% of registered voters over 100 years voted, while in other electoral processes this percentage has dropped even more.

IV. The trends of participation in elections in polling stations on Election Day, in urban and rural areas, show that the percentage is always higher in urban areas (cities). This percentage (40.45% and 40.42%) is approximate only in the 2009 Local Elections, while in other processes, there is a marked difference. The biggest difference, of 6.04%, was recorded in the 2021 Assembly Elections, as participation in urban areas was 47.91%, while in rural areas it was 41.87%. In this document, the data on participation in the elections in seven large municipalities have been analyzed in detail: Gjakova, Gjilan, South Mitrovica, Peja, Prishtina, Prizren and Ferizaj. In the Municipality of Gjakova,

there is a more pronounced difference between the participation in voting in urban and rural areas, where the participation in urban areas is in many cases over 10% higher than that in rural areas. Approximate voting percentages are observed in Gjilan, PEC , Prishtina and Prizren, where in these municipalities, in most cases, there is a slightly higher voter turnout in urban areas than in rural ones. Different trends are observed in the Municipality of South Mitrovica and Ferizaj, where there was a higher participation in voting in rural areas than in urban areas.

V. Unlike regular voting, Participation in voting on Election Day, but through non-regular voting (conditional votes in double polling stations) has marked a decrease in Local Elections, from about 27 thousand in Local elections 2009, to about 16 thousand in Local elections 2017 and 2021. Meanwhile, this number is higher in the Assembly Elections. In the 2021 elections, the largest number of conditional votes, 32,290, was registered. This because in Local elections each municipality is a separate electoral zone (38 municipalities - 38 electoral zones) and therefore conditional voting is only allowed in the municipality where the voter is registered, while in the Assembly Elections, Kosovo is a separate electoral zone and this allows a voter to vote conditionally in one of the polling centers in any municipality.

If we refer to the percentage of participation of voters who registered for voting by mail, the data show that this percentage was higher in the Local elections 2009. However, if we talk only with the number of voters registered for voting by mail nd then how many of them sent the ballot, we can say that in 2021 their number for the first time was five digits, 57,065. At the same time, the largest number of voters registered to vote by mail, over 102,000, was also registered in these elections.

PART ONE

1. GENERAL ELECTION TRENDS IN THE REPUBLIC OF KOSOVO, 2009 - 2021[1]

It is natural that after each election process the number of voters increases, as based on the data, a significant number of citizens reach the age of 18, i.e. the right to vote, or are provided with documents of the Republic of Kosovo and consequently becoming part of the voting list.

The data, presented in the tables below, show that there has been a continuous increase in registered voters, with the exception of 2021. The highest percentage of participation in the 2009 − 2021 electoral processes was recorded in the Assembly Elections 2021 (47.68%), while the lowest percentage of participation is for the Assembly Elections of 2017, which is 41.30%. While, in Local Elections, the highest participation was recorded in 2013 after 837,709 citizens voted out of 1,792,913 with the right to vote, or 46.72% of them.[2]

By analyzing the data from the Assembly Elections, we can come to some conclusions [3]:
1. Data on voting participation in polling stations, on election day, show that it varies from about 40% (38.89%, 2017) to about 46% (45.42%, 2021);

2. Conditional voting, on Election Day, is following almost the same trend (2010 − 28,487; 2017 − 25,378; 2019 − 26,382 and 2021 − 29,524), with the exception of the 2014 election, when this number had dropped to almost 22,000. These numbers are higher than in Local elections due to the fact that Kosovo is a single electoral zone;

3. The trends of participation in elections through mobile teams (voting of persons with special needs, outside the polling stations) on election day is staying in almost approximate numbers in every election process, from 2,000 to 3,000; and

4. Voting by mail marks different trends in every electoral process for the Assembly of Kosovo. In the 2010, 2014 and 2017 elections, these data do not indicate a large number of registered voters who sent their ballots to the CEC address, but the situation has changed in the two subsequent processes. In 2019, 20,200 voters outside Kosovo voted, while in 2021, a record number of them was recorded: 57,065.

According to general data from Local elections for Municipal Assembly, it is concluded that [4]:
1. Participation in voting, at polling stations on Election Day, is presented each time from about 42% (2009, 2017 and 2021) to about 46% (2013);

2. Conditional voting records much lower numbers, compared to those of the Assembly Elections. This happens because the Municipality is a single electoral district and a voter cannot vote in the other municipality, where he is not registered;

3. Data on the voting of persons with special needs in Local Elections are in almost the same trends as Assembly Elections, because the reasons for registration and voting from these categories remain the same regardless of the type of election.

---

[1] *Local elections in the Republic of Kosovo are organized for the election of (38) Mayors of Municipalities and (38) Municipal Assemblies. The data on Local Elections refer only to Municipal Assembly Elections, so not to those for Mayors.*

[2] *This part is about general data: regular voting in polling stations, conditional voting in double polling stations, voting of persons with special needs and voting by mail.*

[3] *This includes only data from voting in regular polling stations on Election Day.*

[4] *In addition, only the data from voting in regular polling stations, on Election Day, are included here.*

Table 1: General statistics in the Elections for the Assembly of Kosovo in 2010, 2014, 2017, 2019 and 2021

2010 ASSEMBLY ELECTIONS	Number of registered voters	Number of voters who have voted	% participation in the voting
Regular voting at polling stations		707,656	43.40%
Conditional voting in double polling stations	1,630,636	28,487	1.75%
Special Needs Voting		3,002	0.18%
By mail voting	1,640	1,053	64.21%

2021 LOCAL ELECTIONS	Number of registred voters	Number of voters who have voted	% of participation in the voting
Regular voting at polling stations		787,360	41.76%
Conditional voting in double polling stations	1,885,448	13,343	0.71%
Special Needs Voting		2,540	0.13%
By mail voting	15,523	6,656	42.88%
Totali	1,900,971	809,899	42.60%

1.1.Percentage of participation in elections in the Republic of Kosovo, 2009 - 2021[5]

It is understandable that the percentage of participation in elections is different from one electoral process to another, however the data shows that this does not change much. This percentage varies from 41% to about 47%. Also, if the data from the graph is analyzed, the percentage of participation in the elections is different even within the same type of elections.

Although it was established that after the Elections for the Assembly in Kosovo (2010) the percentage of participation had started to decrease in the two electoral processes (2014 and 2017), which changed after the Elections for the Kosovo Assembly (2019) where the turnout reached 44% and in the elections in 2021

Meanwhile, the trend of the percentage of participation in Local Elections is almost the same in two electoral processes (2009 and 2017), but the highest participation recorded so far was recorded in the electoral process of 2013 (46.72%). At the same time, this data, 46.72%, is the highest recorded in the time period 2009 - 2021.

[5] In the graphs presented here, the percentage is the result of including all regular voters, voters with special needs, conditional voters, and voters from abroad (by mail), i.e. the data from both tables 1 and 2.

Note: The data presented on the following pages refer only to the participation of voters in regular voting, in polling stations, on Election Day. Data from conditional voting in double polling stations, by mail voting and voting of persons with special needs will be covered in the last part of this document (part 5).

1.2. Trends of participation by municipalities in Kosovo Assembly Elections, 2010 - 2021

The following data reflect in detail how the participation in the elections is presented, in each municipality of the Republic of Kosovo in the Assembly Elections, during the years: 2010, 2014, 2017, 2019 and 2021.

Table 3[6]: Voter turnout on election day, according to municipalities, in Kosovo Assembly Elections, 2010 - 2021.

	2010			2014			2017			2019			2021		
	Registered voters	Voters who have voted		Registered voters	Voters who have voted		Registered voters	Voters who have voted		Registered voters	Voters who have voted		Registered voters	Voters who have voted

1.2.1. The five municipalities with the highest and lowest voter turnout in Kosovo Assembly Elections, 2010 - 2021

In the Assembly Elections 2010, we note that in five different municipalities the highest percentage of participation in voting (over 50%) was recorded. In these elections, it is noticeable that in the capital of Kosovo, Pristina, more than half of the citizens with the right to vote (51.71%) voted on the day of the elections. Participation in voting in the municipality of Pristina is recorded over 50% also in the other three electoral processes of 2014, 2019 and 2021.

In Assembly Elections 2014, we note that the municipalities with the most participation are, in addition to Pristina, also Gllogoci/Drenasi, Skënderaj and Partes. In these elections, it is clearly observed that in none of these municipalities the percentage of participation did not exceed 50 percent.

In the Assembly Elections 2017, when we talk about the five municipalities with the highest participation in the voting, the trend of the percentage of participation in the voting is changed, returning to over 50%. Even in the next two elections (2019 and 2021) we also find municipalities that record participation in voting at over 50%, but with the exception of the capital, number of registered voters in these municipalities (Zubin Potok, Strpce , Zvecan , North Mitrovica and Klokot) is 4 and 5 digits.

Assem

Table 4: The five municipalities with the highest voter turnout in Kosovo Assembly Elections, 2010 – 2021.

	2010		2014		2017		2019		2021	
1	Mamusha	59.61%	Gllogoc	49.72%	Z. Potok	61.13%	Z. Potok	56.18%	Leposavic	84.53%
2	Skënderaj	58.40%	Klokot	49.12%	Strpce	53.60%	Strpce	54.44%	Z. Potok	82.91%
3	Gllogoc	54.29%	Skënderaj	48.99%	Partes	51.31%	Pristina	53.03%	Zvecan	80.99%
4	Pristina	51.71%	Pristina	48.94%	Novobërdë	50.17%	Zvecan	50.60%	North M.	66.70%
5	Lipjan	51.68%	Partes	48.76%	Raniluk	49.99%	Klokot	50.38%	Pristina	53.63%

In the 2010 Assembly Elections, the lowest turnout figures were recorded. However, many of these municipalities (Leposavic, Zvecan, Zubin Potok, Raniluk and North Mitrovica) which we find in the table of the lowest percentage of participation in the elections, are also listed in the previous table, as part of the municipalities with the highest percentage of voter turnout in the subsequent electoral processes

In the list of the lowest percentage of turnout, we often find the municipalities of Dragash, Gjakova, and Klina. In addition, according to the following table, the low percentage of participation shows that in the **Assembly Elections (2010, 2014, 2017, 2019 and 2021)** in these municipalities, the voting participation has never reached 40%.

Table 5: The five municipalities with the lowest voter turnout in Kosovo Assembly Election, 2010 - 2021

	2010		2014		2017		2019		2021

1.3.1.   The five municipalities with the highest and lowest voter tunout in Local elections, 2009 - 2021

In general, based on the data presented in the table below, the highest voter turnout was recorded in municipalities with a small number of registered voters. For the most part, these are municipalities with a 3- or 4-digit number of registered voters and very rarely in municipalities with a 5-digit number of voters.

In the Local elections for the Municipal Assembly of 2009, Gllogoc/Drenas, Mamusha, Skënderaj, Hani i Elezit and Shtimje, are the five municipalities with the highest voter turnout on election day.

The two municipalities, Mamusha and Hani i Elezit, are also on the list of municipalities with the highest percentage of participation **in the Local elections of 2013 and 2017**, while Partes and Klokot are also part of this list.

In Local elections 2021, for the first time, five municipalities, which were not in the three previous election processes, enter the list of the highest voting percentage. Zvecan, Leposavic, North Mitrovica, Zubin Potok and Novobërda, have percentages of participation in the elections by voters, which vary from about 60% to about 84%.

Table 7: The five municipalities with the highest voter turnout in Local Elections, 2009 – 2021.

	2009		2013		2017		2021	
1	Gllogoc	**62.40%**	Mamusha	**63.48%**	Mamusha	**63.99%**	Zvecan	**83.73%**
2	Mamusha	**62.05%**	Partes	**63.13%**	Klokot	**62.37%**	Leposavic	**74.88%**
3	Skënderaj	**58.79%**	Klokot	**62.78%**	Partes	**55.86%**	North M.	**68.31%**
4	Hani i Elezit	**54.76%**	Hani i Elezit	**61.72%**	Hani i Elezit	**55.78%**	Mamusha	**65.69%**
5	Shtime	**50.38%**	Strpce	**58.30%**	Strpce	**55.29%**	Zubin Potok	**64.38%**

The lowest percentage of participation **in Local elections** was recorded in the two electoral processes of 2009 and 2013. Part of the list of municipalities with the lowest participation in Local Elections are the 3 municipalities that have 6 digits of voters registered in the voters list: Gjakova, Prizren and Peja. Present in this table are the municipality of Skenderaj (2013, 2017) and the municipality of Klina (2017, 2021).

Table 8: The five municipalities with the lowest turnout in Local Elections, 2009 – 2021.

2. VOTER TURNOUT BY GENDER: WHO VOTES MORE?

- Who participates more in voting: men or women?

- Are there more male or female voters?

These are just some of the questions that are often asked whenever participation in the elections in the Republic of Kosovo is discussed. The following table shows precisely the trends of participation in elections by gender. The data reflected in this table include only voters who cast their ballots at regular polling stations in relation to registered voters of the respective gender in the final voter list.

Table 9: Number of registered voters and voters who voted, divided by gender, in Assembly Elections and Local elections, 2009 – 2021.

	Registered male voters	Number of male voters who voted	Registered female voters	Number of female voters who voted
2009 – **LOCAL ELECTIONS**	807,011	372,551	756,730	283,694
2010 – **ASSEMBLY ELECTIONS**	840,946	411,376	789,690	296,280
2013 – **LOCAL ELECTIONS**	912,321	387,627	867,036	425,186
2014 – **ASSEMBLY ELECTIONS**	912,797	421,824	869,657	312,692
2017 – **ASSEMBLY ELECTIONS**	956,580	431,212	916,361	315,949
2017 – **LOCAL ELECTIONS**	966,147	453,812	924,805	357,905
2019 – **ASSEMBLY ELECTIONS**	987,673	462,009	950,195	364,988
2021 – **ASSEMBLY ELECTIONS**	915,528	463,786	879,334	351,441
2021 – **LOCAL ELECTIONS**	967,504	442,757	917,944	344,603

Based on the data from the final voter lists (2009, 2010; 2014; 2017; 2019; 2021), in each of the electoral processes organized during this period, men constitute the largest number of voters in our country. In addition, participation in voting is higher among men. This does not apply only to the Local elections of 2013 when the highest female voter turnout in the history of elections in Kosovo was recorded. This participation, in the same election process, was significantly higher and in relation to men for 37,559 female voters. The highest number of mens participation in an election process during this period is recorded in 2021 Kosovo Assembly Elections (50.66%).

Graph 5: Percentage of voter turnout by gender in Assembly and Local Elections, 2009 - 2021
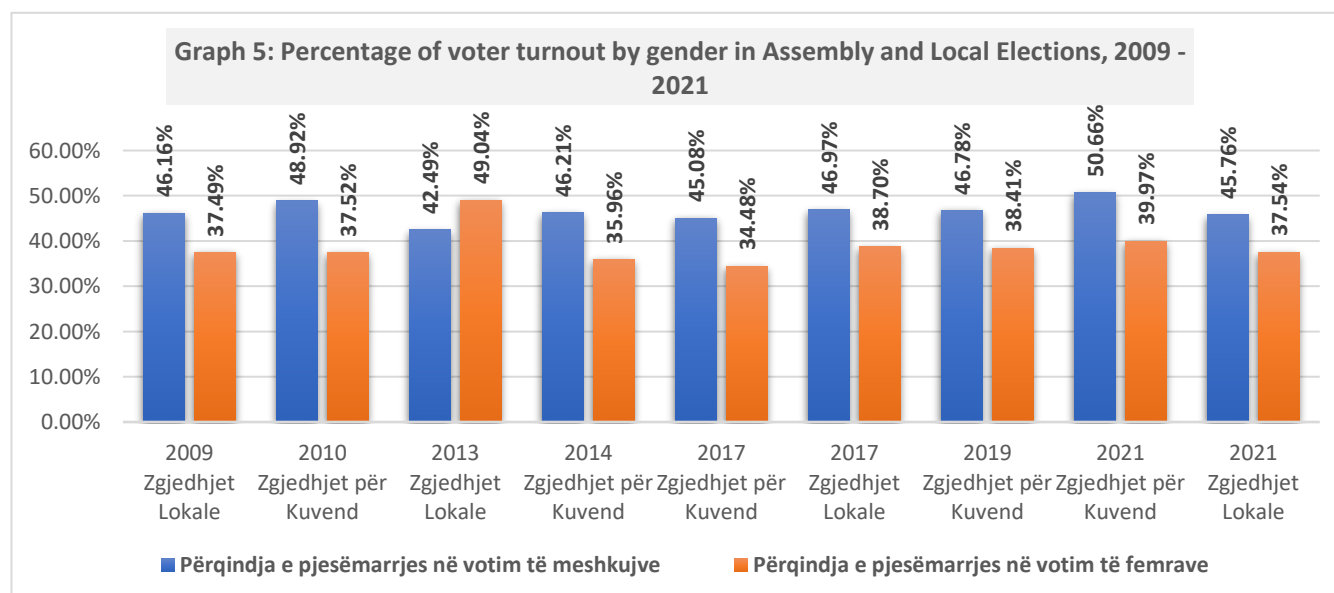

2.2. Voter turnout by gender in the Assembly Elections in all municipalities of Kosovo

The following data reflect the participation in the Elections for the Kosovo Assembly, with special emphasis on the participation of men in the five parliamentary election processes. The following table shows in detail the number of male voters registered in each of the municipalities of the Republic of Kosovo and how many of them voted on Election Day.

Table 10: Male voter turnout by municipality in Kosovo Assembly Elections, 2010 – 2021.

2.2.1. Findings on voter turnout by gender in the Assembly Elections in the municipalities of Kosovo

The trends show a marked difference in the participation of men and women in the elections for the Assembly of Kosovo. While we have a large number of municipalities with a participation of over 50% of men (15 municipalities in the 2010 elections, 11 municipalities in the 2014 elections, 9 in the 2017 elections, 15 in 2019 and 22 in 2021), the number of municipalities with a participation of over 50% of for women is very small (1 Municipality in the 2010 elections, none in 2014, 2 in 2017, 2 in 2019 and 6 in 2021).

The following tables reflect the highest and lowest participation of men, in five municipalities, in Assembly Elections in Kosovo (2010, 2014, 2017, 2019 and 2021).

Table 12: The five municipalities with the highest male voter turnout in the Kosovo Assembly Elections, 2010 – 2021.

2.3. Voter turnout by gender in Local Elections in all municipalities of Kosovo

In the following two tables, we will present data on the participation of male voters in the four processes of Local Elections for the Municipal Assembly. In addition, these tables will show the number of them registered in the voter list of each municipality.

The data presented in these two tables will enable us to draw conclusions about which are the five municipalities with the highest and lowest participation of voters on Election Day.

The following data reflect the participation in the Elections for the Assembly of Kosovo, with special emphasis on the **female voter turnout** in the five parliamentary election processes. The following table shows in detail the number of female voters registered in each of the municipalities of the Republic of Kosovo and how many of them voted on Election Day.

Table 17: Female voter turnout in Local elections for the Municipal Assembly, 2009 - 2021.

2.3.1. Findings on voter turnout by gender in Local Elections in the municipalities of Kosovo

TThe trends show a marked difference in the participation of men and women in the elections for the Assembly of Kosovo. While we have a large number of municipalities with over 50% male voter turnout (10 municipalities in the 2009 elections, 5 municipalities in the 2013 elections, 16 in the 2017 elections and 18 in 2021), the number of municipalities with over 50% female voter turnout is very small, with the exception of 2013 (4 municipalities in the 2009 elections, 20 in 2013, 7 in 2017 and 11 in 2021).

The following tables reflect the highest and lowest participation of men, in five municipalities, in the Kosovo Assembly Elections (2009, 2013, 2017 and 2021).

Table 18: The five municipalities with the highest male voter turnout in Local Elections, 2009 – 2021.

PART THREE

3. VOTER TURNOUT BY AGE GROUPS: 18 – 21; 22-25; 26-40; 41-64; 65-99; AND OVER 100 YEARS OLD [7]

This chapter will provide a large number of answers related to participation in central or local elections and that according to six age groups (18-21; 22-25; 26-40; 41-64; 65-99 ; and over 100). In addition, these data are also divided according to gender participation in these electoral processes.

The general data, presented in the table, show the participation in voting by age groups in all electoral processes (2009 - 2021) on the day of the elections, in the polling stations.

Table 22: Voter turnout by age group in Assembly Elections and Local elections, 2009 – 2021.

---

[7] *The data shown in the table shows the percentage within the age group. Therefore, what is the registered number of voters within a certain age group and what percentage of them voted. Example in the 2010 Elections: **77,326: 147,228 X 100 = 52.52%.***

Based on the data presented in the previous table and in the graph below, it can be concluded that the age groups 18 - 21 years and 41 - 46 years reach the highest percentage in the elections.

Age group 18 - 21 years old has marked the highest percentage of participation in voting in Local elections 2013, which reached 56.11%, when out of 157,397 registered voters from this age group, 88,311 of them voted. A high percentage of participation in this age group was also registered in the Assembly Elections 2021 (53%).

Age group 22-25 years, in no case has reached 50 percent of participation in any of the nine electoral processes. The highest percentage of voting participation from this age group was recorded in Local elections 2013, at around 48%, while the lowest percentage in Assembly Elections 2021, at around 42%.

Age group 26 - 40 years and age group 65 - 99 years have the lowest percentages of participation in election processes in our country. In most cases, this percentage is around 35%.

Age group 41 - 64 years old, records the higher results of participation in the voting. It is the group, after the group of 18-21 years old, which participates the most in election processes, on Election Day. In addition, this age group has the largest number of citizens with the right to vote, compared to all other age groups.

Age group over > 100 years old has the smallest number of registered voters and their participation in voting. Only in Local elections 2009, 9.06% of registered voters over 100 years of age voted, while in other electoral processes this percentage has dropped even more.

Graph 6: Participation in voting on election day by age group in the Assembly and Local Elections, 2009 - 2021.
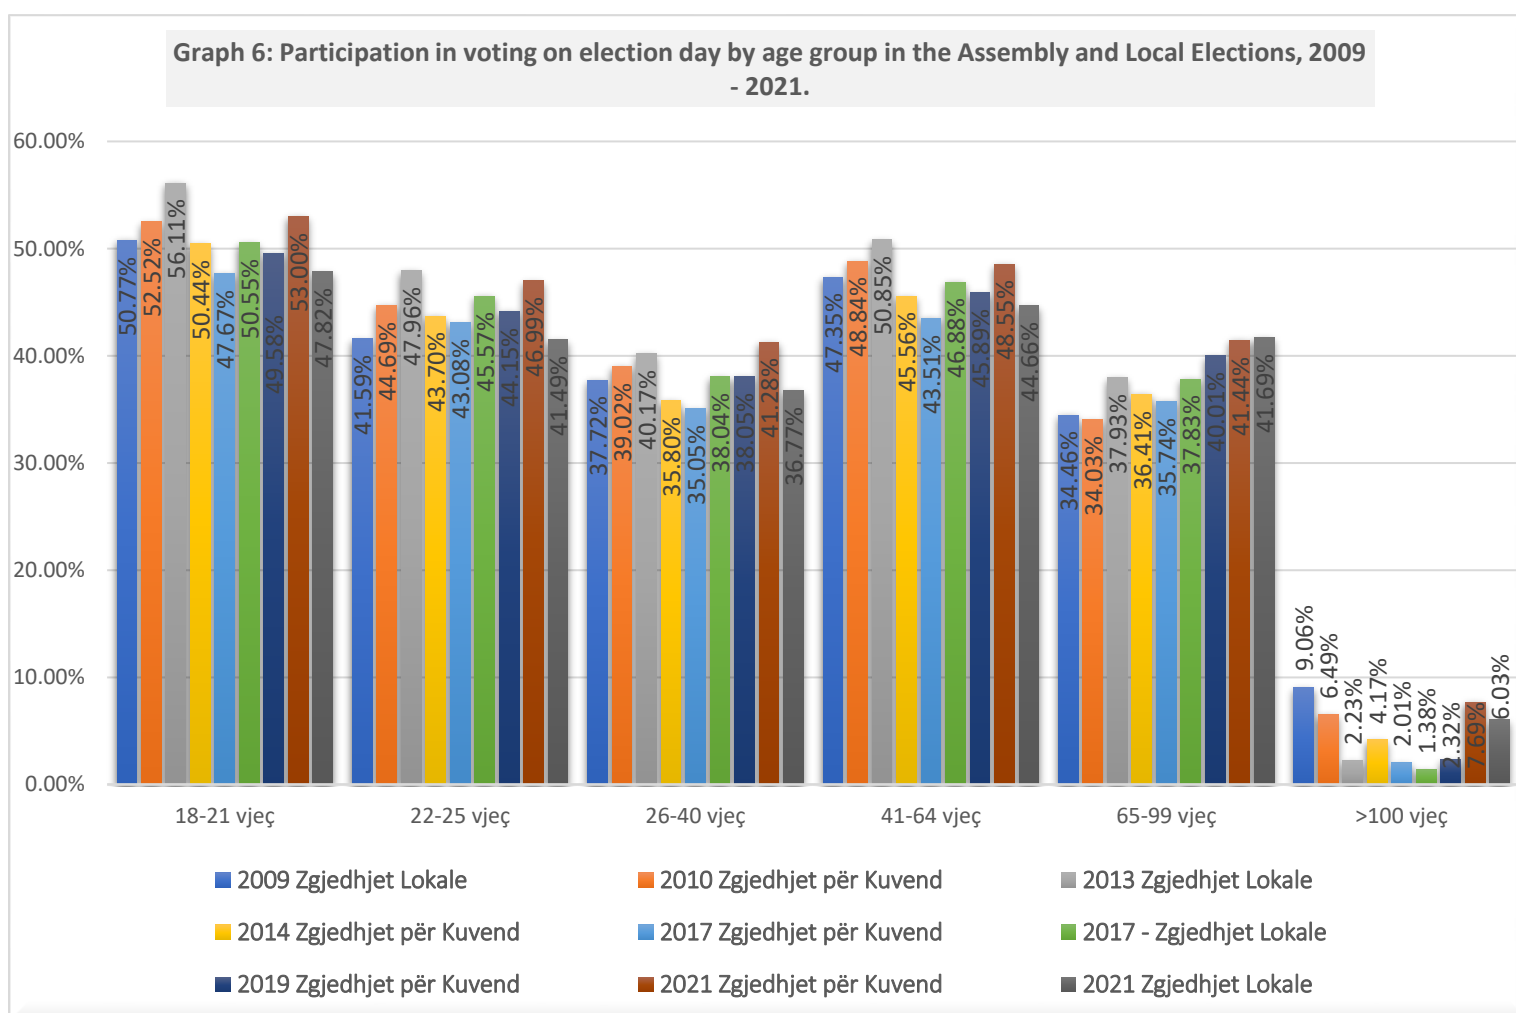

3.2. Participation in Assembly and Local Elections by gender and age groups [8]

The table above (21) will be further broken down in the following table, presenting the participation in voting according to age groups (18 - 21; 22 - 25; 26 - 40; 41 - 64; 65 - 99; and over 100), but also divided by gender.

Table 24: Voter turnout by age group and gender in Assembly Elections and Local elections, 2009 – 2021.

[8] *The data reflected in the table show the percentage within the age group. Turnout percentages are derived by dividing the number of voters of one gender who voted by the number of registered voters of that gender. Ex: 46,082 (voters who voted): 78,985 (registered voters) X 100 = 58.34%.*

Based on the data from the table, for men, in general, the 18-21 age group registers the highest participation in all electoral processes. The data speak of a participation of over 50% (2009 – 55.45%; 2010 – 58.34%; 2013 – 51.42%; 2014 – 54.15%; 2017 – 51.42%; 2017 – 53.36%, 2019 – 53.36%, 2021 – 56.65% and 2021 – 50.83%).

The situation is different with the participation in the elections of the 26-40-year-olds, which marks the lowest percentage, although the number of citizens with the right to vote, within them, has always been over half a million voters.

Graph 7: Participation of men by age group in the Assembly and Local Elections, 2009 - 2021
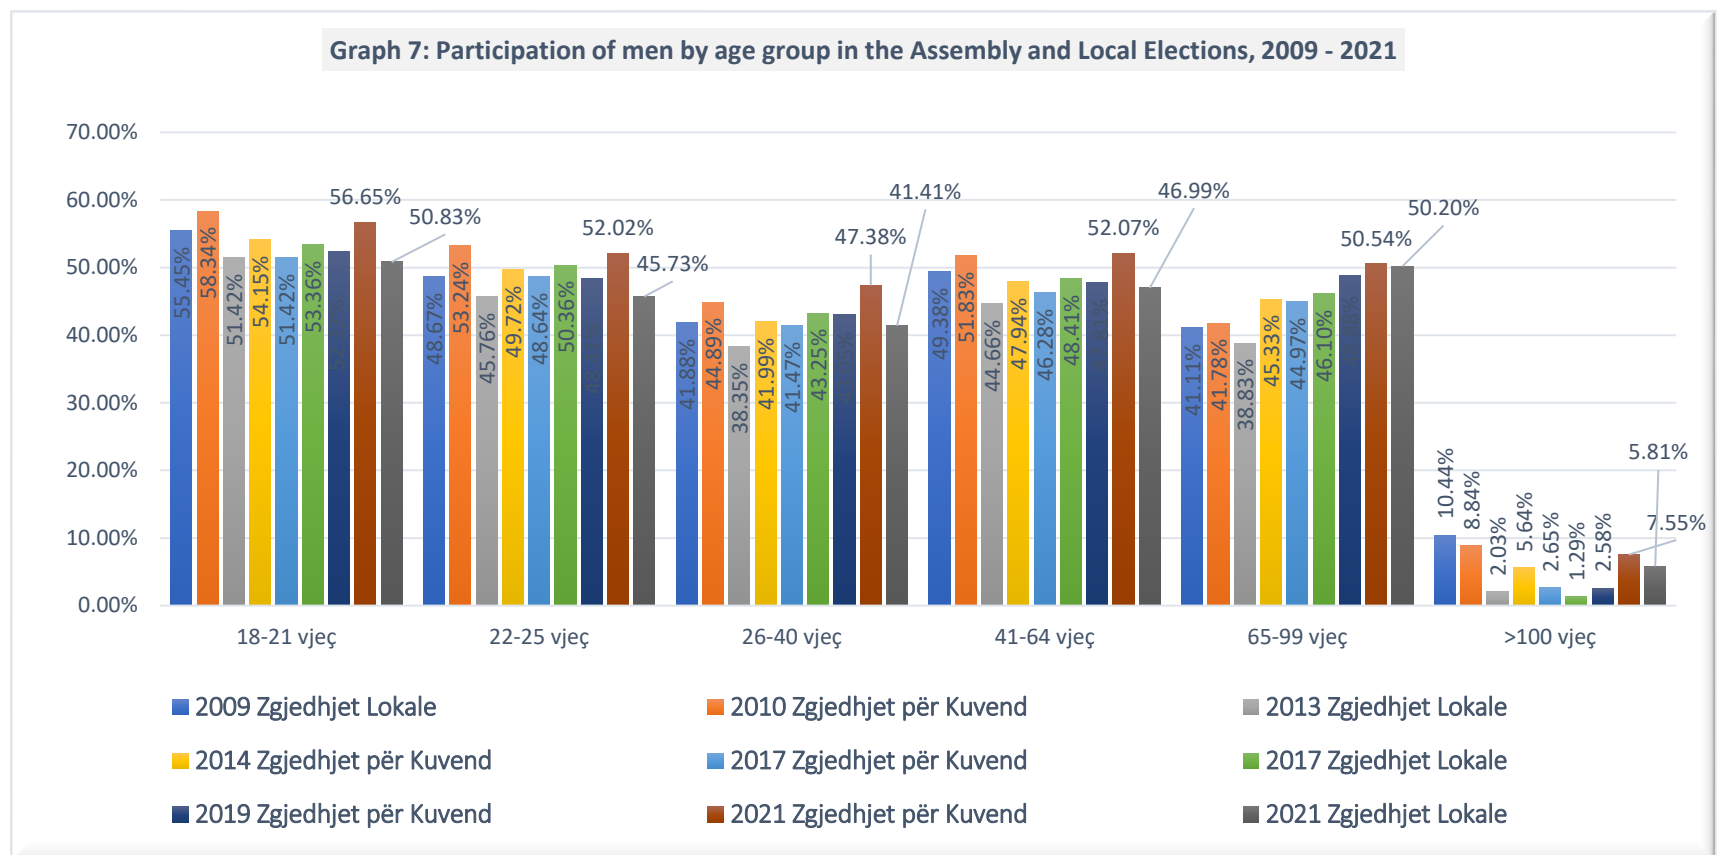

Analyzing the data presented in the graph below, we note that the electoral record in terms of the percentage of participation in voting, was registered among women aged 18-21 years during the Local Elections of 2013 (61.33%). While, without counting the participation in voting of the age group over 100 years old due to the small number of citizens with the right to vote, the lowest percentage of female voter turnout was recorded in the age group 65 - 99 years old (27.06%) during the Assembly Elections in the year 2010.

Grafikon 8: Female voter turnout by age group Assembly Elections and Local Elections , 2009 - 2021.
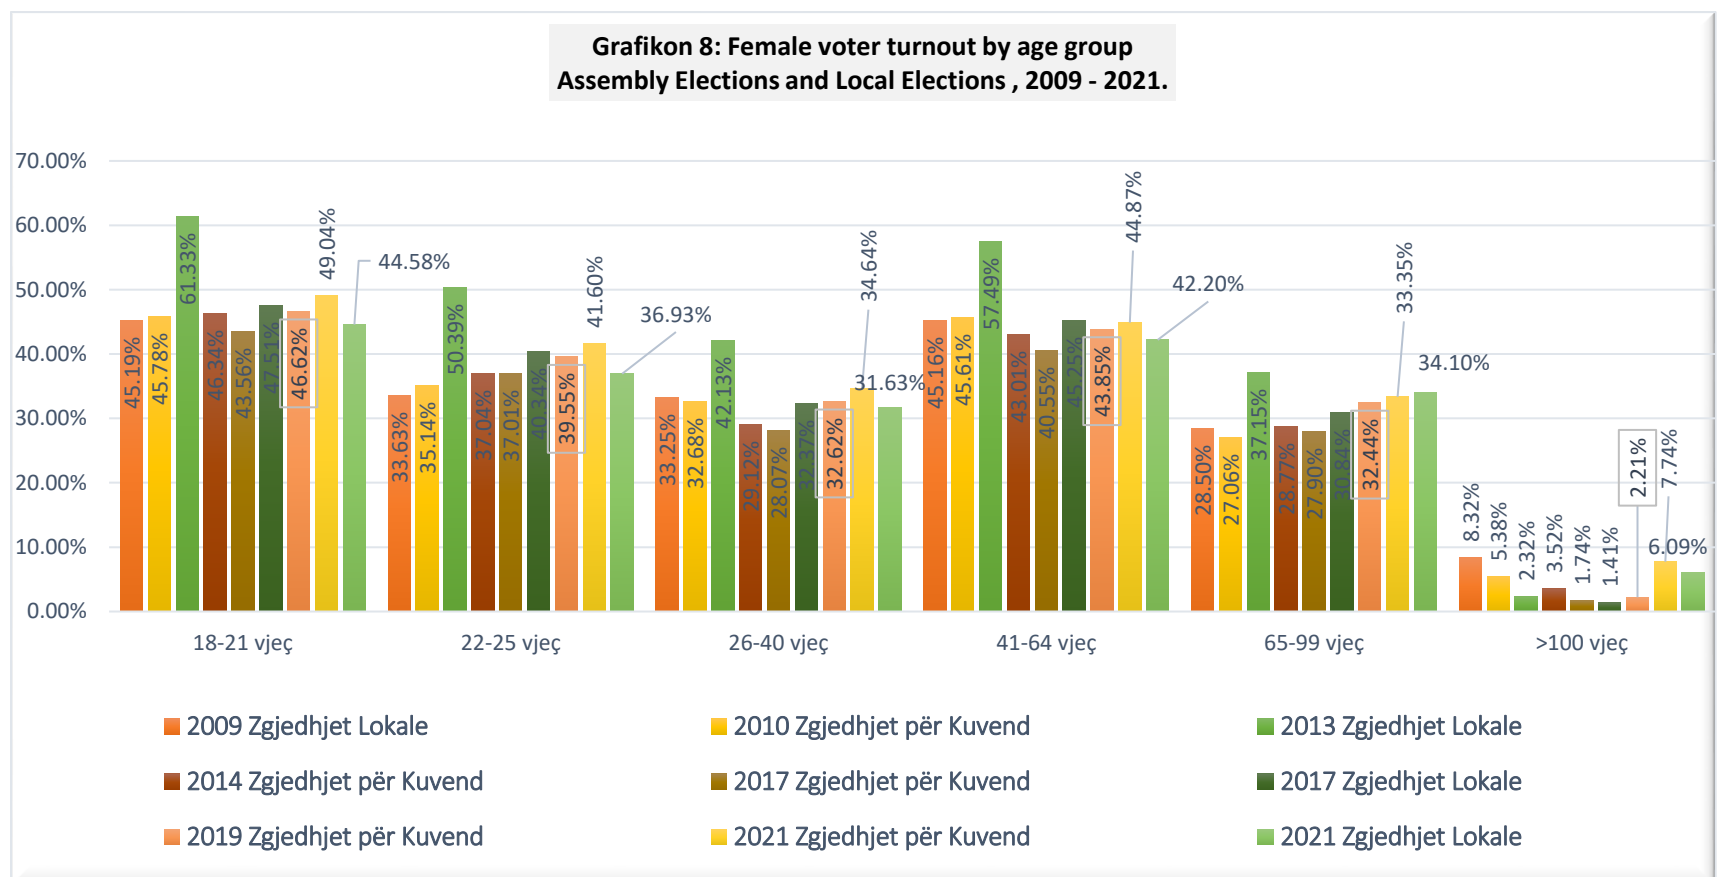

3.3. Participation of the age group 18 - 21 years, by gender and municipalities in the Kosovo Assembly Elections

The data presented in the following table show the participation of male and female voters in the age group of 18-21 years in all municipalities of the Republic of Kosovo and in the five election processes for the Assembly of Kosovo. Number of registered voters of this age group varies from about 126 thousand voters to about 160 thousand (2010 – 147,228; 2014 – 139,636; 2017 – 136,773; 2019 – 159,260; and 2021 – 126,487).

Table 24: Percentage of voter turnout by gender of the 18-21 age group in the Assembly Elections, 2010 – 2021.

3.4. Participation of the age group 18 – 21 years, by gender and municipalities in Local Elections

During the period 2009 - 2021, four election processes were organized at the local level. The data presented in the table below show the participation of male and female voters in the age group of 18-21 years in each municipality of Kosovo. The number of registered voters of this age group is usually over 150 thousand (2009 – 134,802; 2013 – 157,397; 2017 – 153,737; and 2021 – 157,515).

Table 29: Percentage of voter turnout by gender of the 18-21 age group in Local Elections, 2009 – 2021

3.7. *Participation of the age group 26 – 40 years, by gender and municipalities in Kosovo Assembly Elections*

The data presented in the following table show the participation of male and female voters of the age group 26-40 years old in all municipalities of the Republic of Kosovo and in the five election processes for the Assembly of Kosovo. This age group is one of the two age groups with the largest number of citizens with the right to vote (2010 – 585,157; 2014 – 611,726; 2017 – 614,284; 2019 – 614,697; and 2021 – 574,349).

Table 44: Percentage of voter turnout by gender and municipality of age group 26 – 40 years old in the Assembly Elections, 2010 – 2021.

3.8. Participation of the age group 26 – 40 years, by gender and municipalities in Local Elections

The age group 26-40 years old includes a large number of citizens with the right to vote. In the following table, the data are grouped as before, and include the number of registered voters, by gender and by municipality, as well as their participation in voting, on Election Day. The number of registered voters of this age group is large (2009 – 571,601; 2013 – 609,195; 2017 – 617,234; 2021 – 599,952).

Table 49: Percentage of voter turnout of the age group 26 – 40 years old, by gender in Local Elections 2009 – 2021

3.9. Participation of the age group 41 – 64 years old, by gender and municipalities in Kosovo Assembly Elections

The data presented in the following table show the participation of male and female voters of the age group 41-64 years old in all municipalities of the Republic of Kosovo and in the five election processes for the Assembly of Kosovo. This age group has the largest number of citizens with the right to vote. The age group 41-64 years old constitutes the largest number of citizens with the right to vote (2010 – 539,650; 2014 – 633,105; 2017 – 697,907; 2019 – 730,701; and 2021 – 693,262).

Table 54: Percentage of voter turnout by gender and municipality of age group 41 – 64 in the Assembly Elections, 2010 – 2021.

ASSEMBLY ELECTIONS		2010 Registered voters	2010 Voters who have voted		2014 Registered voters	2014 Voters who have voted		2017 Registered voters	2017 Voters who have voted		2019 Registered voters	2019 Voters who have voted		2021 Registered voters	2021 Voters who have voted

3.11. Participation of the age group 65 – 99 years, by gender and municipalities in Kosovo Assembly Elections

The data presented in the table below show the participation of male and female voters in the age group 65-99 years old in all municipalities of the Republic of Kosovo and in the five electoral processes for the Assembly of Kosovo. Unlike the previous two age groups, this age group has a smaller number of registered voters (2010 – 200,151; 2014 – 226,451; 2017 – 250,513; 2019 – 261,887; and 2021 – 245,731).

Table 64: Percentage of voter turnout of the age group 65 – 99 years old, by gender and municipalities in the Assembly Elections, 2010 – 2021.

3.12. Participation of age group 65 – 99 years, by gender and municipalities in Local Elections

In the age group 65-99 years old, we have a relatively high number of voters. Even in the following table, the data are grouped according to the same methodology and include the number of registered voters, by gender and by municipality, as well as their participation in voting on Election Day. In addition, unlike the previous two age groups, in this age group the Number of registered voters is lower (2009 – 190,780; 2013 – 226,918; 2017 – 246,619; and 2021 – 241,697).

Table 69: Percentage of voter turnout of the age group 65 – 99 years old, by gender and municipalities in Local Elections, 2009 – 2021.

3.13. Participation of the age group over 100 years old, by gender and municipalities in the Kosovo Assembly Elections

The data presented in the following table show the participation of male and female voters of the age group >100 years old in all municipalities of the Republic of Kosovo and in the five election processes for the Assembly of Kosovo. It is natural that in this age group the Number of registered voters is very low (2010 – 1,233; 2014 – 2,014; 2017 – 2,939; 2019 – 3,794 and 2021 – 442).

Table 74: Voter turnout percentage of the age group over 100 years by gender and municipalities in in the Assembly Elections, 2010 – 2021.

The data of the five municipalities with the lowest male voter participation (over 100 years old) present a very low percentage. In general, it is about the voting of dozens of people. In the elections of 2021, only in two municipalities (Z. Potok and Ferizaj) was a vote of over 100 years olds, while in other municipalities there was no case of voting of this age group.

Table 76: The five municipalities with the lowest male voter turnout (over 100 years) in Assembly Elections, 2010 – 2021.

	2010		2014		2017		2019		2021	
1	Podujeva	7.32%	Istog	4.35%	Zvecan	50.00%	North M.	40.00%	Z. Potok	50.00%
2	Mitrovica	6.67%	Podujeva	3.57%	North M.	17.65%	Z. Potok	34.15%	Ferizaj	16.67%
3	Istog	6.25%	Gjakova	3.33%	Shtime	4.17%	Zvecan	20.00%	*Tjerat*	0.00%
4	Gjakova	5.56%	PEC	2.50%	Gjakova	2.04%	Vushtrri	3.13%	*Tjerat*	0.00%
5	Vushtrri	5.56%	Pristina	2.00%	Pristina	1.25%	Pristina	0.96%	*Tjerat*	0.00%

Based on the data from the following Table, the highest percentage of female voter turnout in the age group over 100 year's old usually ranges from 50-60%. Here, the 2021 elections are an exception, where five municipalities are listed with a high percentage of participation in the voting from about 70% to about 90%.

Table 77: The five municipalities with the highest female voter turnout (over 100 years) in Assembly Elections, 2010 – 2021.

	2010		2014		2017		2019		2021	
1	Malisheva	29.41%	Z. Potok	37.50%	Z. Potok	50.00%	Mitrovica e V.	43.90%	North M.	100.00%

Likewise, even in the list of 5 municipalities with the lowest percentage of participation of women over 100 years old in voting, municipalities with a very low, single-digit percentage are listed.

Table 78: The five municipalities with the lowest female voter turnout (mbi 100 years old) in Assembly Elections, 2010 – 2021.

---

[9] *In the age group over 100 years old, the number of voters is very small; therefore these percentages should be viewed in relation to the table on the previous page, where the number of registered voters over 100 years old in each municipality is presented. In the 2021 Assembly Elections in Zveçan, the voting participation of men over 100 years old is calculated to be 100% since the only registered voter from this age group voted.*

3.14. Participation of the age group over 100 years, by gender and municipalities in Local Elections

The data presented in the following table show the participation of male and female voters of the age group >100 years old in all municipalities of the Republic of Kosovo and in the five election processes for the Assembly of Kosovo. As in Assembly Elections, in Local elections the number of registered voters of this age group is very low (2009 – 850; 2013 – 2,109; 2017 – 2,906; and 2021 – 365).

---

[10] *In the age group over 100 years old, the number of voters is very small; therefore these percentages should be viewed in relation to the table on the previous page, where the number of registered voters over 100 years old in each municipality is presented. It should be mentioned that in Kllokot (2009) or in Obiliq (2021) the participation of women over 100 years old is 100%, since the only female voter voted.*

PART FOUR

4. ELECTORAL TRENDS IN URBAN AND RURAL AREAS

Data on election processes during this decade show that the number of registered voters is higher in urban areas. In this document, the analysis is based on the data of the seven largest municipalities, which constitute about 45% of the polling stations and voters registered in the final voter list. The seven largest municipalities are Gjakova, Gjilani, South Mitrovica, Peja, Prishtina, Prizren and Ferizaj.

4.1. Voters of urban and rural areas

The data shown in the table below shows the exact number of registered voters in urban areas (cities) and rural areas (villages) as well as the number of voters who voted divided by these areas belonging to these seven large municipalities.

Table 84: Number of registered voters and voters who voted, in urban and rural areas of 7 large municipalities

	Number of **registered** voters in urban areas	Number of voters **who voted** in urban areas		Number of **registered** voters in rural areas	Number of voters **who voted** in rural areas	
2009 – **LOCAL ELECTIONS**	462,094	186,922	40.45%	270,755	109,437	40.42%
2010 – **ASSEMBLY ELECTIONS**	474,567	209,459	44.14%	288,281	115,903	40.20%
2013 – **ELECTIONS LOCAL**	497,376	233,886	47.02%	308,770	133,119	**43.11%**
2014 – **ASSEMBLY ELECTIONS**	497,182	214,191	43.08%	311,275	121,157	38.92%
2017 – **ASSEMBLY ELECTIONS**	522,315	222,835	42.66%	336,150	126,929	37.76%
2017 – **ELECTIONS LOCAL**	525,429	228,209	43.43%	344,952	141,223	40.94%
2019 – **ASSEMBLY ELECTIONS**	552,740	251,565	45.51%	342,176	137,338	40.14%
2021 – **ASSEMBLY ELECTIONS**	507,620	243,210	**47.91%**	329,728	138,070	41.87%
2021 – **LOCAL ELECTIONS**	535,962	215,998	40.30%	347,189	131,466	37.87%

According to the data shown above, we can conclude that the percentage of participation in elections always remains higher in urban areas (cities). This percentage is approximate only in the Local elections 2013, while in other processes, there is a significant difference. The biggest difference, of 6.04%, was recorded in the Assembly Elections 2021, as participation in urban areas was 47.91%, while in rural areas it was 41.87%.

### 4.1.1. Gjakova – Voter turnout, by gender and by areas (urban / rural)

The municipality of Gjakova/Đakovica is among the municipalities that have over 100,000 registered voters since the 2013 elections.

The data in the table below shows the number of registered voters by area (urban/rural) and the percentage of their participation in the Assembly Elections (2010; 2014; 2017; 2019 and 2021) and in Local elections (2009; 2013; 2017 and 2021).

Table 85: Gjakova – Registered voters by area (urban/rural) and their participation in the voting

GJAKOVË		Registered voters	Voters who voted (%)	
2009 – LOCAL ELECTION	Urban	47,384	23,597	49.80%
	Rural	44,482	18,363	41.28%
2010 – ASSEMBLY ELECTION	Urban	50,190	22,114	44.06%
	Rural	47,025	15,128	32.17%
2013 – LOCAL ELECTION	Urban	53,909	26,712	49.55%
	Rural	53,516	18,711	34.96%
2014 – ASSEMBLY ELECTION	Urban	53,813	21,423	39.81%
	Rural	54,031	15,818	29.28%
2017 – ASSEMBLY ELECTION	Urban	55,045	21,865	39.72%
	Rural	58,136	16,560	28.48%
2017 – LOCAL ELECTION	Urban	55,443	23,967	43.23%
	Rural	58,980	18,676	31.66%
2019 – ASSEMBLY ELECTION	Urban	56,348	23,598	41.88%
	Rural	60,303	18,526	30.72%
2021 – ASSEMBLY ELECTION	Urban	52,584	23,372	44.45%
	Rural	55,958	17,137	30.62%
2021 – LOCAL ELECTION	Urban	54,681	22,574	41.28%
	Rural	58,484	17,981	30.75%

The data reflect that in all election processes (2009 - 2021) the highest percentage of voting participation was recorded in urban areas, in the city of Gjakova. However, this percentage never reaches 50%.

Graph 10: **Voter tunout percentage by area in Municipality of Gjakova**
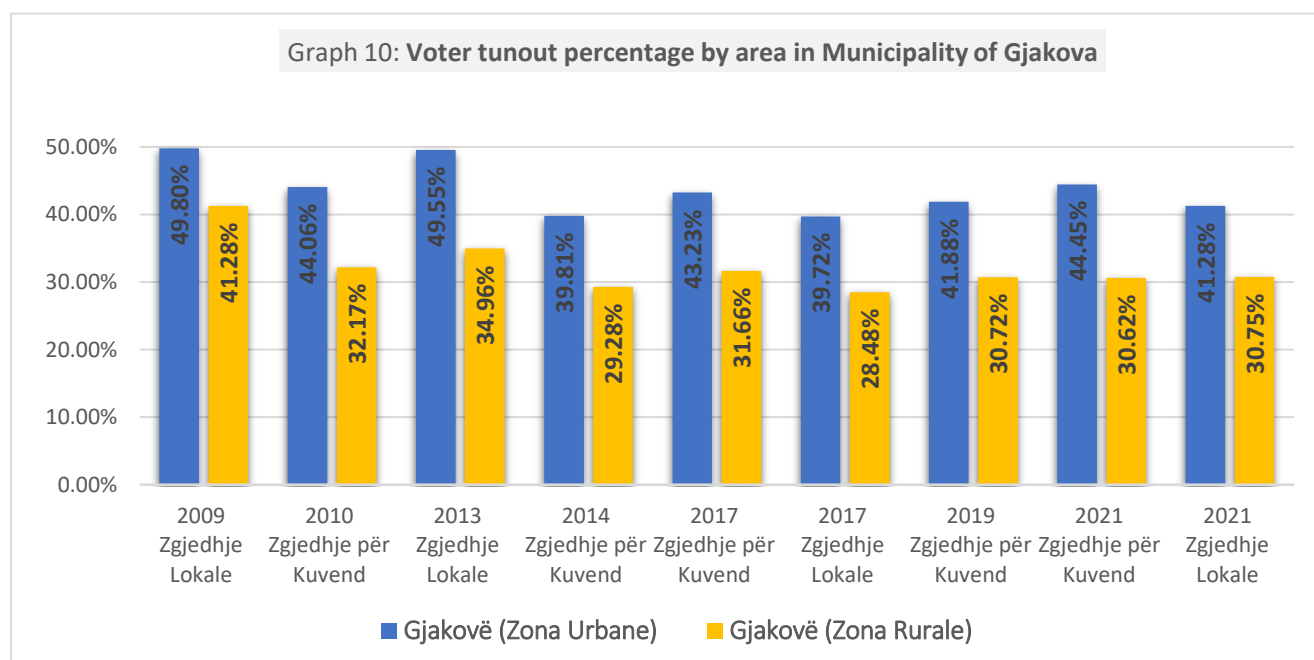

The data of the preliminary table are further detailed below, also divided by gender and by areas (Urban and Rural).

What stands out is that the percentage of participation above 50% is registered only in two cases: in Local elections 2009 (M - 52.11%) and in Local elections 2013 (F - 55.07%).

Urban area – From the comparison of the data, we conclude that Voter turnout percentage in polling stations is higher for men in all cases, with the exception of the 2013 Local Elections when 55.07% of women voted compared to 43.96% of men.

Rural area –Even in the rural area of the municipality of Gjakova, the percentage of participation in the elections is higher among men. However, this percentage does not exceed 40%, with the exception of the 2009 Local Elections. While, according to these data, the percentage of female voter turnout in elections, which is lower, is below 30% in almost all cases, with the exception of the Local Elections of 2009 and 2013.

Table 86: Gjakova – Registered voters and their participation in voting, by gender and by areas (Urban / Rural)

		Rural	58,484	30,590	10,298	34.67%	27,894	7,376	26.44%

### 4.1.2. Gjilan - Voter turnout, by gender and by areas (urban/rural)

The municipality of Gjilan is among the seven municipalities with the largest number of registered voters during the election processes in our country.

The data in the table below shows the number of registered voters by area (urban/rural) and the percentage of their participation in the Assembly Elections (2010; 2014; 2017; 2019 and 2021) and in Local elections (2009; 2013; 2017 and 2021).

Table 87: Gjilan – Registered voters by area (urban/rural) and their participation in the voting

GJILAN		Registered voters	Voters who voted (%)	
2009 – LOCAL ELECTION	Urban	50,764	23,627	**46.54%**
	Rural	36,666	14,554	**39.69%**
2010 – ASSEMBLY ELECTION	Urban	52,755	25,589	**48.51%**
	Rural	34,632	16,148	**46.63%**
2013 – LOCAL ELECTION	Urban	56,277	29,070	**51.66%**
	Rural	37,991	19,254	**50.68%**
2014 – ASSEMBLY ELECTION	Urban	56,417	24,926	**44.18%**
	Rural	38,008	16,622	**43.73%**
2017 – ASSEMBLY ELECTION	Urban	58,962	26,590	**45.10%**
	Rural	40,072	17,266	**43.09%**
2017 – LOCAL ELECTION	Urban	59,775	27,687	**46.32%**
	Rural	40,630	18,523	**45.59%**
2019 – ASSEMBLY ELECTION	Urban	61,795	28,328	**45.84%**
	Rural	41,258	18,146	**43.98%**
2021 – ASSEMBLY ELECTION	Urban	56,427	28,357	**50.25%**
	Rural	37,866	18,046	**47.66%**
2021 – LOCAL ELECTION	Urban	60,823	25,819	**42.45%**
	Rural	40,239	17,105	**42.51%**

The data show that in all election processes (2009 – 2021) there is a small difference in the percentage of participation in the voting. So, the participation in elections of citizens in the Urban and Rural area is almost the same. In one case (Local elections 2021), this percentage is higher in rural areas.
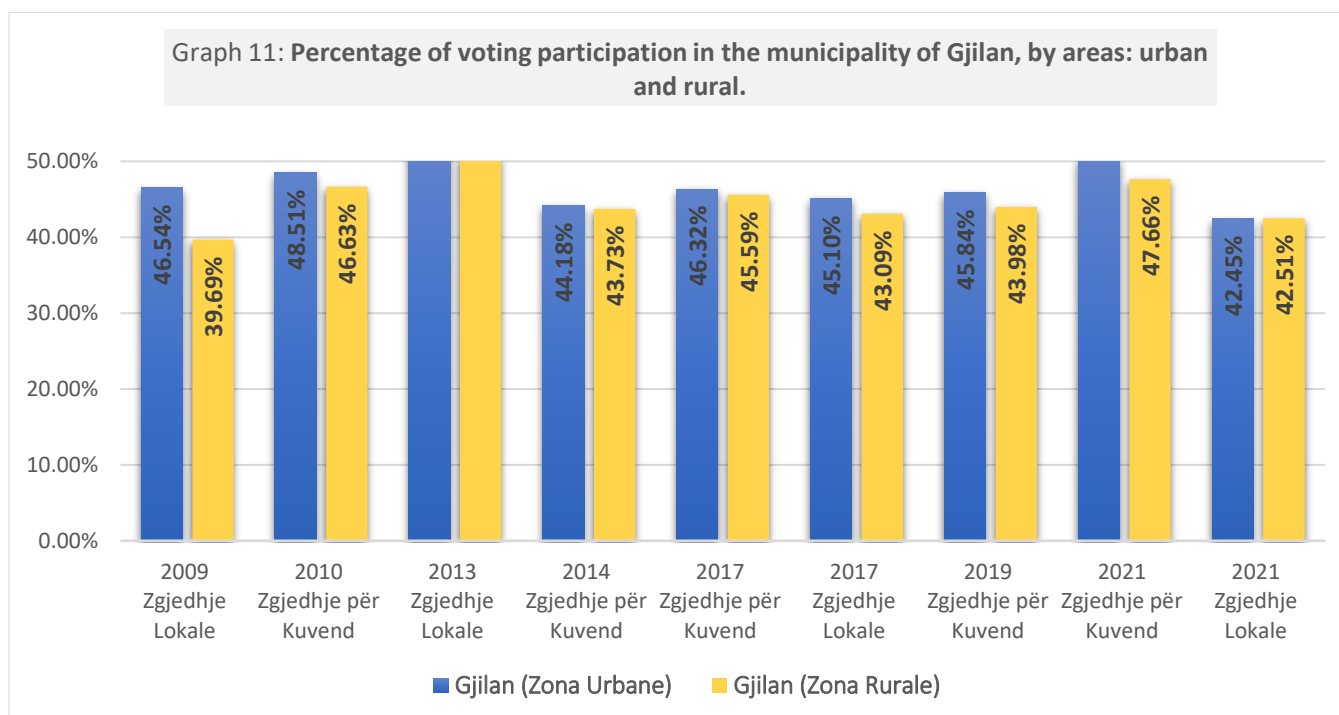

Graph 11: **Percentage of voting participation in the municipality of Gjilan, by areas: urban and rural.**

The data of the table presented above are further detailed below, also divided by gender and by areas (Urban and Rural).

For men, the percentage of participation above 50% is registered simultaneously in Assembly Elections 2010 (Urban 52.86%; Rural 51.49%) and in Assembly Elections 2021 (Urban 53.83%; Rural 53.70%), while for women, this percentage is registered in Local elections 2013 (Urban 56.63%; Rural 55.41%).

Urban area –From the comparison of the data, we come to the conclusion that the Voter turnout percentage in the polling stations is in all cases higher among men, with the exception of the 2013 Local Elections when 65.63% of women voted compared to 46.87% of men. The highest difference in percentage in the Urban area, about 9%, was observed in the Assembly Elections 2010 (M – 52.86%; F – 43.96%).

Rural area –Even in the rural area of the municipality of Gjilan, the percentage of participation in the elections is higher among men, with the exception of the 2013 Local Elections, when even in the Rural area, women have recorded the largest turnout in voting at the polling stations. In general, the data in the following table show that in the Rural area the difference in participation in the elections, according to the two genders, is higher compared to the Urban area.

Table 87: Gjilan – Registered voters and their participation in voting, by gender and by areas (Urban / Rural)

| GJILAN			Total number of registered voters	M		F	
				Registered male voters	Male voters who voted	Registered female voters	Female voters who voted

4.1.3. Mitrovica South - Voter turnout, by gender and by areas (urban / rural)

The data in the table below shows the number of registered voters by area (urban/rural) and the percentage of their participation in the Assembly Elections (2010; 2014; 2017; 2019 and 2021) and in Local elections (2009; 2013; 2017 and 2021).

Table 89: Mitrovica South – Registered voters by area (urban/rural) and their participation in the voting

MITROVICA SOUTH		Registered voters	Voters who voted (%)	
2009 – LOCAL ELECTION	Urban	58,586	16,403	**28.00%**
	Rural	24,721	9,977	**40.36%**
2010 – ASSEMBLY ELECTION	Urban	53,630	11,095	**20.69%**
	Rural	33,204	11,282	**33.98%**
2013 – LOCAL ELECTION	Urban	45,537	18,178	**39.92%**
	Rural	27,023	11,386	**42.13%**
2014 – ASSEMBLY ELECTION	Urban	45,789	17,642	**38.53%**
	Rural	26,975	10,953	**40.60%**
2017 – ASSEMBLY ELECTION	Urban	48,917	17,795	**36.38%**
	Rural	28,469	11,100	**38.99%**
2017 – LOCAL ELECTION	Urban	50,620	18,838	**37.21%**
	Rural	28,428	12,250	**43.09%**
2019 – ASSEMBLY ELECTION	Urban	59,277	23,565	**39.75%**
	Rural	21,329	9,183	**43.05%**
2021 – ASSEMBLY ELECTION	Urban	45,960	19,459	**42.34%**
	Rural	28,197	13,007	**46.13%**
2021 – LOCAL ELECTION	Urban	48,943	18,147	**37.08%**
	Rural	29,603	12,537	**42.35%**

 The Municipality of South Mitrovica has the largest number of registered voters in the Urban area, however, the data in the table below show that the highest percentage of voting participation is from voters from rural area. The biggest difference in participation in elections is reflected in Local elections 2009 and Assembly Elections 2010, which ranges from 12 to 13%.
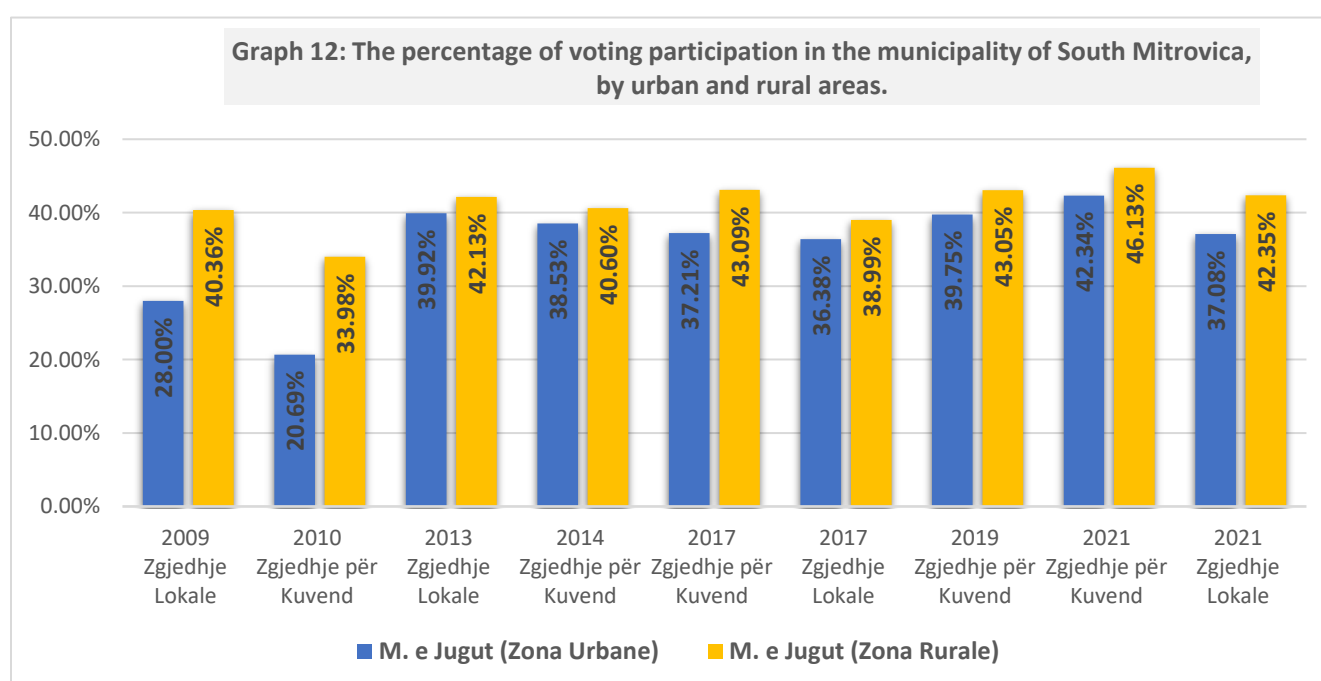

Graph 12: The percentage of voting participation in the municipality of South Mitrovica, by urban and rural areas.

The data of the table presented above, are further detailed below, also divided by gender and by areas (Urban and Rural).

Looking at the percentage of participation in all electoral processes (2009 - 2021) in the municipality of South Mitrovica, this percentage has only once exceeded 50%, and that was in the Assembly Elections 2021 (Rural, M: 53.23%).

Urban area –The following table shows that in this area, the percentage of male voter turnout is higher in almost all electoral processes compared to female participation, with the exception of the local elections in 2013, when 42.37% of women voted in comparison with 37.53% of men.

Rural area –In the Rural area of the South Mitrovica municipality, usually men participate more in voting in polling stations. An exception here, as in other municipalities, are the data of the Local Elections 2013. According to these data, there is a marked difference in the turnout of men in voting, in polling stations, which in some cases goes up to about 15% or in about 20%.

Table 90: Mitrovica South - Registered voters and their participation in voting, by gender and by areas (Urban/Rural)

### 4.1.4. Peja - Voter turnout, by gender and by areas (urban / rural)

The municipality of Peja is among the municipalities, which have over 100,000 registered voters since the 2013 elections.

The data presented in the table below show the number of registered voters by area (Urban / Rural) and the percentage of their participation in Assembly Elections (2010; 2014; 2017; 2019 and 2021) and Local elections (2009; 2013; 2017 and 2021).

Table 91: Peja – Registered voters by area (urban/rural) and their participation in the voting

PEJA		Registered voters	Voters who voted (%)	
2009 – LOCAL ELECTION	Urban	49,555	18,931	38.20%
	Rural	39,601	15,221	38.44%
2010 – ASSEMBLY ELECTION	Urban	51,995	21,944	42.20%
	Rural	41,726	16,385	39.27%
2013 – LOCAL ELECTION	Urban	56,828	23,858	41.98%
	Rural	46,250	18,310	39.59%
2014 – ASSEMBLY ELECTION	Urban	56,835	22,479	39.55%
	Rural	46,655	17,436	37.37%
2017 – ASSEMBLY ELECTION	Urban	58,413	23,194	39.71%
	Rural	51,144	19,038	37.22%
2017 – LOCAL ELECTION	Urban	59,028	23,905	40.50%
	Rural	51,662	19,828	38.38%
2019 – ASSEMBLY ELECTION	Urban	60,357	24,987	41.40%
	Rural	52,896	20,197	38.18%
2021 – ASSEMBLY ELECTION	Urban	55,234	24,718	44.75%
	Rural	48,848	19,308	39.53%
2021 – LOCAL ELECTION	Urban	57,883	20,991	36.26%
	Rural	51,168	17,738	34.67%

In the municipality of Peja, the percentage of voter turnout, divided into Urban and Rural areas, has a narrow difference. Only in Local elections 2009, the highest percentage of votes was recorded in the rural area, while in all other electoral processes; the urban area always has the highest percentage of voter turnout.

Graph 13: The percentage of voter turnout in the municipality of Peja, in urban and rural areas
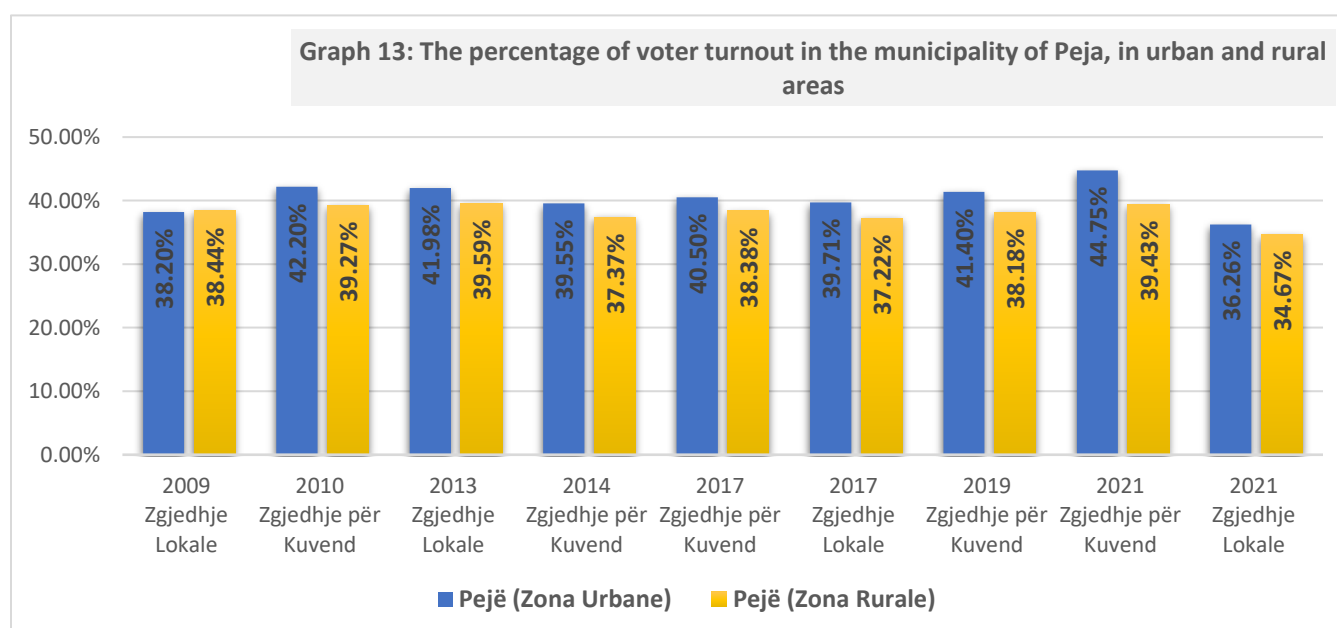

The data of the table presented above, are further detailed below, and also divided by gender and by areas (Urban and Rural).

The percentage of participation in all election processes (2009 - 2021) in the municipality of Peja has never reached over 50%, for any gender and for any urban/rural area.

Urban area – In the Urban area, voter turnout percentage is usually recorded above 40% for men, with the exception of the 2013 (37.50%) and 2021 (38.29%) Local Elections. However, for women, this percentage is usually below 40%, with the exception of the 2013 Local Elections (46.58%) and the 2021 Assembly Elections (42.81%), which is significantly higher.

Rural area – In the Rural area of the municipality of Peje, the data show that in percentage men vote almost as much as in the urban area. This percentage was higher only in two cases, in the two election processes at the local level (2009 and 2021). Meanwhile, other data show that the percentage of women's participation in voting, in polling stations, in the Urban area is always higher compared to the Rural area. This difference is more pronounced than the participation of men in voting.

Table 92: Peja – Registered voters and their participation in voting,
by gender and by areas (Urban/Rural)

4.1.5. Pristina – Voter turnout, by gender and by areas (urban/rural)
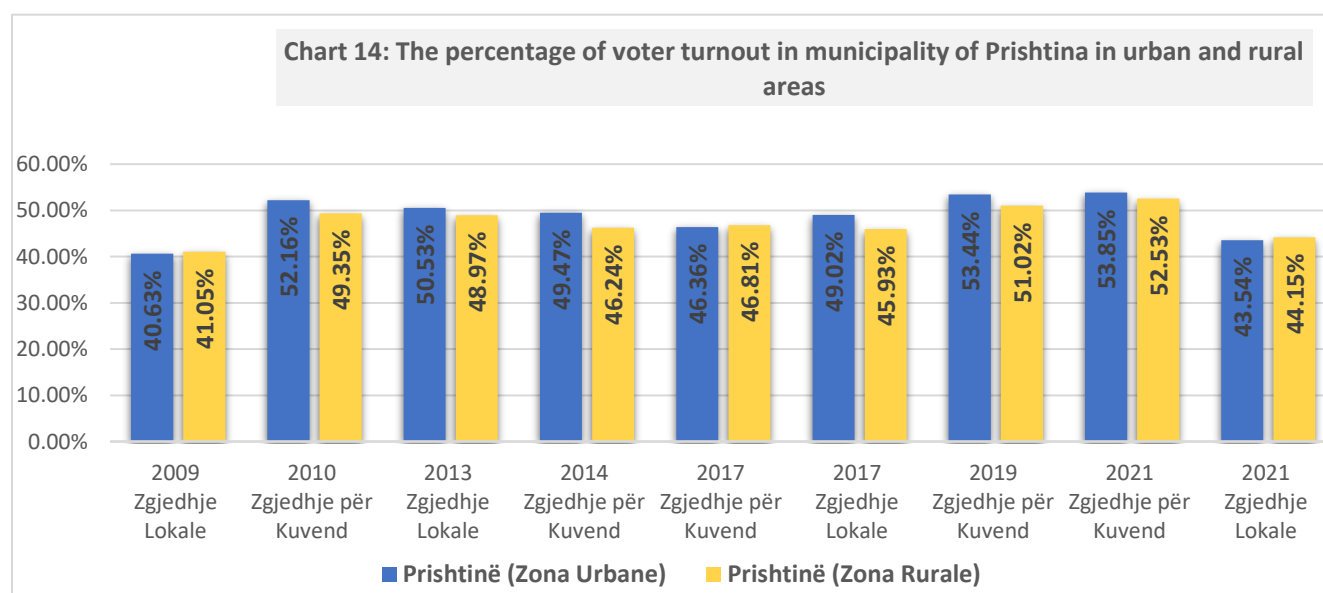

The municipality of Pristina is the municipality with the largest number of registered voters in the Republic of Kosovo. The majority of these voters belong to the urban area.

The data reflected in the table below show the number of registered voters by area (Urban / Rural) and the percentage of their participation in Assembly Elections (2010; 2014; 2017; 2019 and 2021) and Local elections (2009; 2013; 2017 and 2021).

Table 93: Pristina – Registered voters by area (urban/rural) and their participation in the voting

PRISTINA		Registered voters	Voters who voted (%)	
2009 – LOCAL ELECTION	Urban	130,506	53,021	40.63%
	Rural	24,429	10,028	41.05%
2010 – ASSEMBLY ELECTION	Urban	135,504	70,681	52.16%
	Rural	25,732	12,698	49.35%
2013 – LOCAL ELECTION	Urban	143,976	72,749	50.53%
	Rural	28,167	13,792	48.97%
2014 – ASSEMBLY ELECTION	Urban	143,995	71,232	49.47%
	Rural	28,294	13,082	46.24%
2017 – ASSEMBLY ELECTION	Urban	154,368	75,664	49.02%
	Rural	31,114	14,291	45.93%
2017 – LOCAL ELECTION	Urban	156,765	72,672	46.36%
	Rural	31,590	14,787	46.81%
2019 – ASSEMBLY ELECTION	Urban	162,476	86,826	53.44%
	Rural	33,078	16,876	51.02%
2021 – ASSEMBLY ELECTION	Urban	153,886	82,873	53.85%
	Rural	31,749	16,678	52.53%
2021 – LOCAL ELECTION	Urban	162,357	70,685	43.54%
	Rural	33,621	14,842	44.15%

The data from the electoral processes in the municipality of Pristina give another overview of the citizens' participation in the voting. The graph below shows that the percentage of participation above 50% was reached in several electoral processes, in both areas (Urban and Rural), which was not recorded in the municipalities mentioned above (with the exception of Ferizaj).

Chart 14: The percentage of voter turnout in municipality of Prishtina in urban and rural areas

The data in the table above are detailed further on, divided by gender and by areas (Urban and Rural).

The percentage of participation in all electoral processes (2009 - 2021) in the municipality of Pristina has often reached over 50%, for both genders and in both areas (Urban/Rural).

Urban area –In the Urban area, Voter turnout percentage is usually higher among men, with the exception of the 2013 Local Elections when women participated more in the voting. The percentage of participation in the elections, in the municipality of Pristina in urban area, has been recorded over 50% in several election processes (2010, 2014, 2017, 2019 and 2021), while for women, this percentage has been recorded in fewer election processes (2013 and 2019).

Rural area –In the rural area of the municipality of Pristina, the data show that men from rural areas have voted more in polling stations than men from urban areas. The record number was reached in the Assembly Elections 2021 when about 60% of men in the rural area voted. In general, men from rural areas have a higher participation in voting, compared to the turnout of women from rural areas. Here, the data of the 2013 Local Elections are an exception, when the voter turnout was over 50%.

### 4.1.6.   Prizren – Voter turnout, by gender and by areas (urban/rural)

The municipality of Prizren is the second municipality in the Republic of Kosovo in terms of the number of citizens with the right to vote. The majority of these voters belong to the urban area.

The data reflected in the table below show the number of registered voters by area (Urban/Rural) and the percentage of their participation in Assembly Elections (2010; 2014; 2017; 2019 and 2021) and Local elections (2009; 2013; 2017 and 2021).

Table 95: Prizren – Registered voters by area (urban/rural) and their participation in the voting

PRIZREN		Registered voters	Voters who voted (%)	
2009 – LOCAL ELECTION	Urban	78,815	32,096	**40.72%**
	Rural	59,034	22,884	**38.76%**
2010 – ASSEMBLY ELECTION	Urban	82,325	37,804	**45.92%**
	Rural	62,254	25,357	**40.73%**
2013 – LOCAL ELECTION	Urban	90,638	40,794	**45.01%**
	Rural	65,789	26,112	**39.69%**
2014 – ASSEMBLY ELECTION	Urban	90,173	36,208	**40.15%**
	Rural	66,797	23,820	**35.66%**
2017 – ASSEMBLY ELECTION	Urban	94,579	37,017	**39.14%**
	Rural	72,205	23,996	**33.23%**
2017 – LOCAL ELECTION	Urban	91,228	38,133	**41.80%**
	Rural	77,659	28,973	**37.31%**
2019 – ASSEMBLY ELECTION	Urban	98,428	40,272	**40.92%**
	Rural	75,128	26,225	**34.91%**
2021 – ASSEMBLY ELECTION	Urban	93,550	40,380	**43.16%**
	Rural	72,401	25,030	**34.57%**
2021 – LOCAL ELECTION	Urban	97,823	36,182	**36.99%**
	Rural	75,536	23,784	**31.49%**

The general data, presented in the table and in the graph, show that the participation in the elections, in the polling stations, in the municipality of Prizren has never reached more than 50% in any of the areas (Urban/Rural). The percentage of voter participation is lower in the rural area, and only in one case (2010) has reached 40% participation.
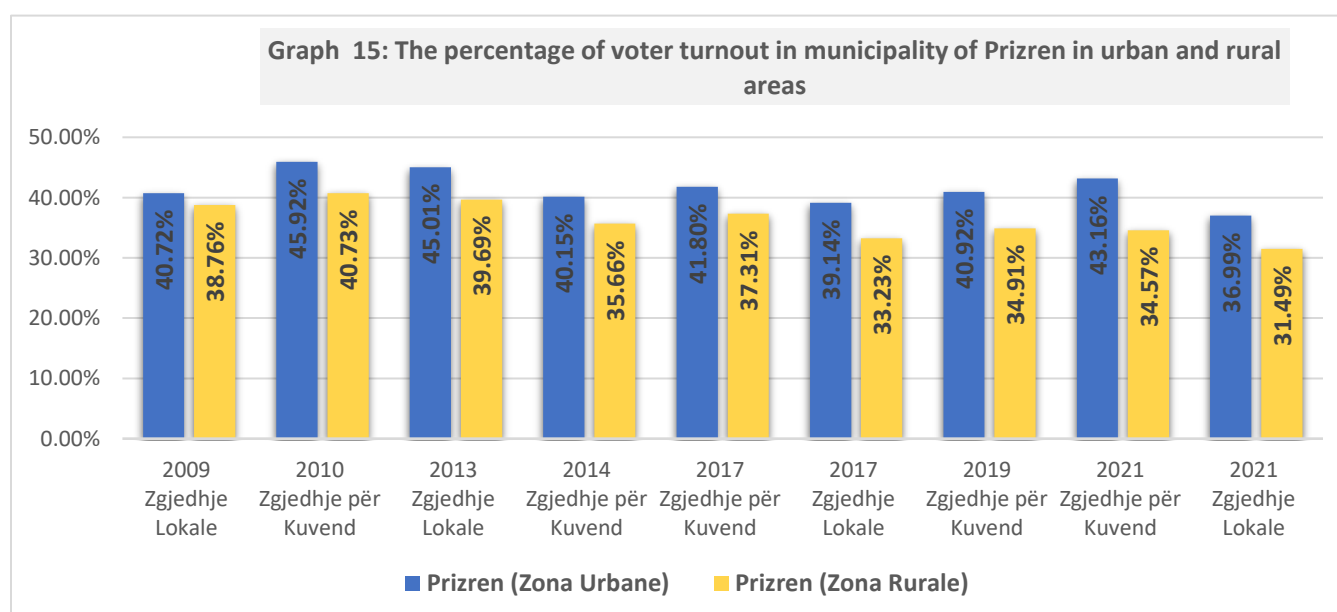

Graph 15: The percentage of voter turnout in municipality of Prizren in urban and rural areas

The data of the table presented above, are further detailed below, also divided by gender and by areas (Urban and Rural).

The percentage of participation in all election processes (2009 – 2021) in the municipality of Prizren, has reached 50.26% in only one case (2010).

Urban area –In the Urban area, in the municipality of Prizren, the highest percentage of voter tunout was recorded in 2010, among male voters in the urban area, who participated in the elections over 50%. In all other cases, this percentage is significantly lower. A low percentage of voter tunout, in polling stations, was also registered among female voters, in all election processes, with the exception of the 2013 Local elections (47.80%).

Rural area –In the rural area of the municipality of Prizren, higher percentages of voter turnout were recorded among male voters, compared to female voters, with the exception of 2013. What is easily noticeable is the low percentage of female voter tunout, which in two cases is below 30% (2017 – 29.82%; 2021 – 28.27%).

### 4.1.7. Ferizaj – Voter turnout, by gender and by areas (urban/rural)

The municipality of Ferizaj is among the municipalities, which since 2013 has a six-digit number of citizens with the right to vote. Since the 2014 elections, the largest number of citizens with the right to vote belongs to the rural area.

The data reflected in the table below show the number of registered voters by area (Urban/Rural) and their turnout rate in the Assembly Elections (2010; 2014; 2017; 2019 and 2021) and Local Elections (2009; 2013; 2017 and 2021).

Table 97: Ferizaj – Registered voters by area (urban/rural) and their participation in the voting

FERIZAJ		Registered voters	Voters who voted (%)	
2009 – LOCAL ELECTION	Urban	46,484	19,247	41.41%
	Rural	41,822	18,410	44.02%
2010 – ASSEMBLY ELECTION	Urban	48,168	20,232	42.00%
	Rural	43,708	18,905	43.25%
2013 – LOCAL ELECTION	Urban	50,211	22,525	44.86%
	Rural	50,034	25,554	51.07%
2014 – ASSEMBLY ELECTION	Urban	50,160	20,281	40.43%
	Rural	50,515	23,426	46.37%
2017 – ASSEMBLY ELECTION	Urban	52,031	20,710	39.80%
	Rural	55,010	24,678	44.86%
2017 – LOCAL ELECTION	Urban	52,570	23,007	43.76%
	Rural	56,003	28,186	50.33%
2019 – ASSEMBLY ELECTION	Urban	54,059	23,989	44.38%
	Rural	58,184	28,185	48.44%
2021 – ASSEMBLY ELECTION	Urban	49,979	24,051	48.12%
	Rural	54,709	28,864	52.76%
2021 – LOCAL ELECTION	Urban	53,452	21,600	40.41%
	Rural	58,538	27,479	46.94%

the municipality of Ferizaj, in all election processes (2009 - 2021), the highest turnout rate, in polling stations, was recorded in the rural area, which in some cases (2013, 2017 and 2021) reached over 50% . The municipality of Ferizaj, together with that of South Mitrovica, give a different overview compared to the data of the other 5 municipalities.
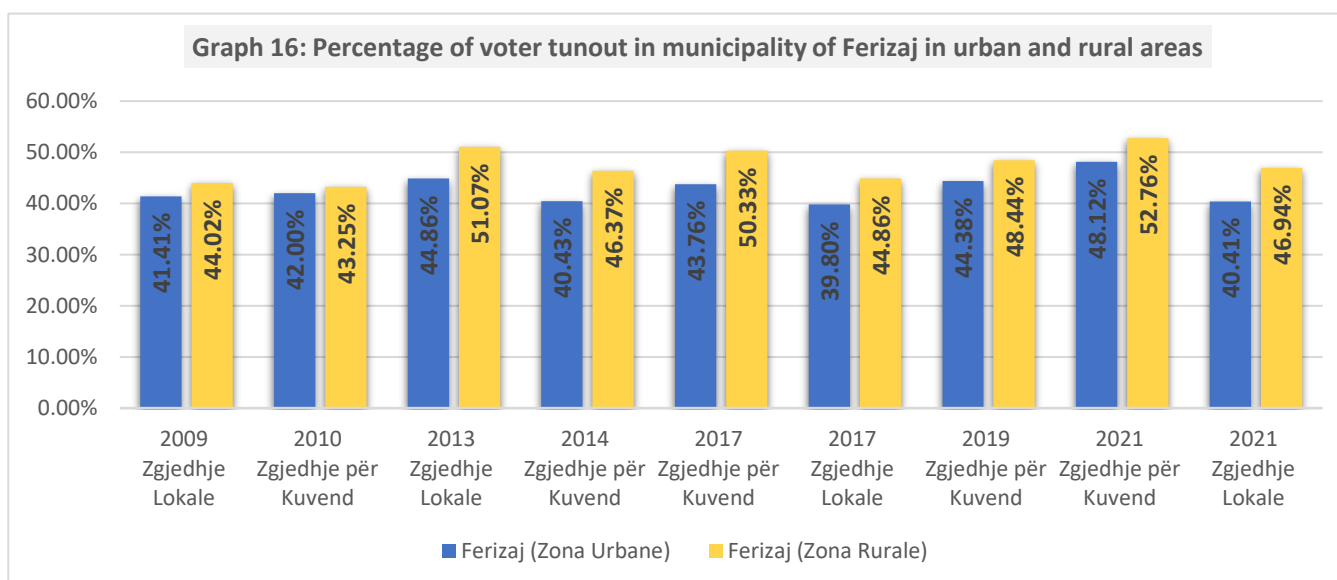

Graph 16: Percentage of voter tunout in municipality of Ferizaj in urban and rural areas

The data of the table presented above, are further detailed below, also divided by gender and by areas (Urban and Rural).

Percentage of participation over 50% in the electoral processes (2009 - 2021) in the municipality of Ferizaj, has been recorded in several cases, among registered voters of both genders and both areas. This is more pronounced in the rural area.

Urban area –In the urban area of the municipality of Ferizaj, Voter turnout percentage is usually recorded higher among male voters and as usual, Local elections 2013 are the exception here. Over 50% of male voters voted only in Assembly Elections 2021, while among female voters, in urban area, no such participation was registered in any election process.

Rural area –In the Rural area of the municipality of Ferizaj, where voter turnout is higher compared to the urban area, the data show that the percentage of turnout in the polling stations is significantly higher among male voters, which in many cases has gone over 50%. Among female voters, the highest turnout was achieved in Local elections 2013, when 54.78% of registered voters voted in the rural area.

Table 96: Ferizaj– Registered voters and their participation in voting, by gender and by areas (Urban/Rural)

4.2. Voter turnout by gender in urban and rural areas in the seven municipalities (Gjakova, Gjilan, Mitrovica South, Peja, Prishtina, Prizren and Ferizaj) in the Assembly Elections and Local Elections

The following table shows the data on the number of registred male and female voters in the last seven pairs of elections at the national level in relation to the number of voters of both genders in urban and rural areas. Trends broken down by gender are consistent with general trends in urban and rural areas.

Table 99: Number of registered male voters who voted in urban and rural areas of seven municipalities

	Number of registered male voters in urban areas	Number of male voters who have voted in urban areas		Number of registered male voters in rural areas	Number of male voters who have voted in rural areas	
2009 – ELECTIONS LOCAL	233,088	102,758	44.09%	141,390	63,559	44.95%
2010 – ASSEMBLY ELECTIONS	239,029	115,463	48.31%	150,246	69,110	46.00%

Graph 30: The percentage of voter turnout by age group in urban and rural areas of seven municipalities - 2021 Assembly Elections
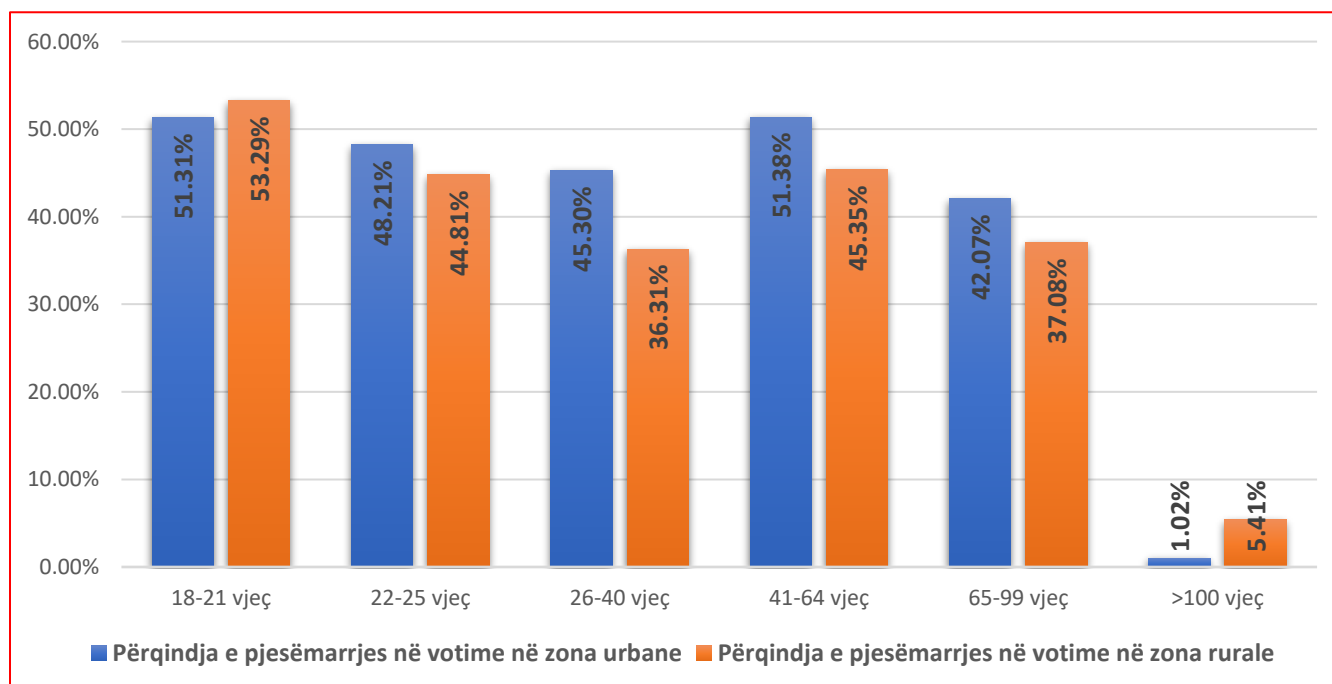

4.2.4. *Voter turnout in Local elections by age groups in urban and rural areas of seven municipalities (Gjakova, Gjilan, Mitrovica e Jugut, Peja, Pristina, Prizren dhe Ferizaj)*

In the 2009 Local elections, from the analysis of the election data of seven municipalities, structured according to age groups, it results that the age group 18-21 years old participates the most in voting (Rural area 47.60%; urban area 46.72%), followed by the age group 41-64 years old (Urban area 46.52%; Rural area 46.49%).

Also, according to the data from these elections, the 65-99 year old age group of the urban area has the lowest voter turnout (30.85%),and 26-40 year old age group of the rural area (35.37%).

Grafikon 31: Përqindja e pjesëmarrjes në votime sipas grupmoshave në zonat urbane dhe rurale të shtatë komunave - Zgjedhjet Lokale 2009

In the 2013 Local elections, it turns out that in the urban area of seven municipalities, the percentage of participation in the elections went over 50%, it is about the age group 18 - 21 only (54.44%) and the age group 41 - 64 years old (51.81%). Whereas, the lowest percentage is presented among the age group 65 - 99 years old (39.17%).

In rural area, according to the data of the 2013 Local Elections, a Voter turnout percentage of over 50% was reached in the age group 18-21 years old (52.09%), followed by the age group 41-64 years old (48.71%). According to the data, the lowest turnout in the rural area is shown in the 26-40 years old age group (36.13%).

Graph 32: Percentage of voter turnout by age group in urban and rural areas of seven municipalities - 2013 Local Elections
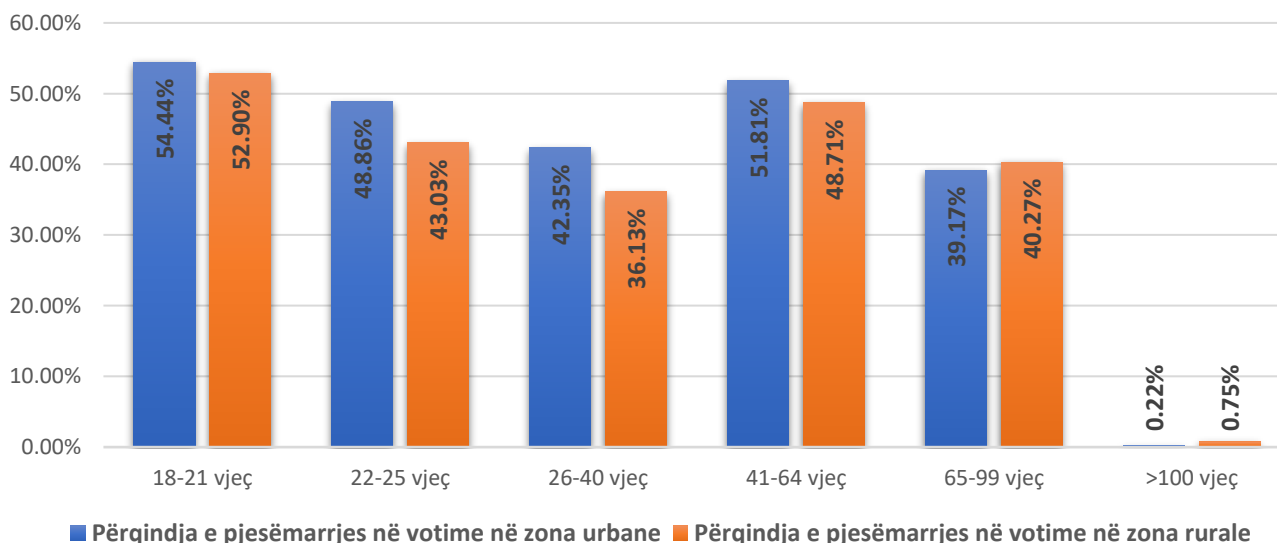

In the 2017 Local elections, unlike the previous elections, the data show that no age group reached the turnout over 50%. In these elections, in the rural area of seven municipalities, the highest percentage of participation in the elections was reached among the 18-21 year old age group (49.96%). Meanwhile, the lowest percentage of voting participation in the rural area was among 26-40 years old (34.15%).

In addition, according to the data of these elections, in the urban area, the 18-21 year old age group has he highest turnout in polling stations (47.50%), followed by the 22-25 age group (45.81%). Meanwhile, the lowest voter turnout in the urban area, was recorded in the age group 26-40 years old (34.15%).

Graph 33: Percentage of voter turnout by age group in urban and rural areas of seven municipalities -2017 Local Elections
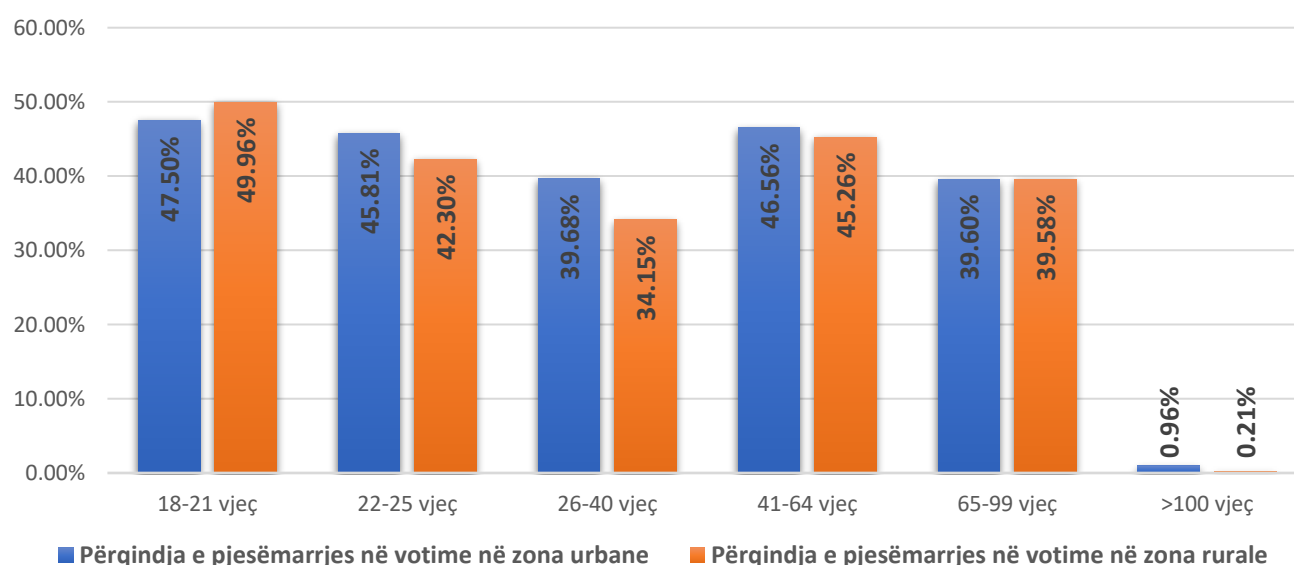

Unlike other electoral processes, the data of the 2021 Local Elections of 2021 show a low voter turnout, in almost all age groups and in both urban and rural areas. In the age group 18-21 years old, the highest percentage of voter turnout was registered in the rural area (47.05%), while the lowest in this area is in the age group 26-40 years old (31.53%).

Even the data of the 2021 local elections, of the urban area, show the lowest turnout. In the age group 41-64 years old, the percentage of voter turnout was 43.29%, while in the other age group 26-40 years old, the turnout was 37.13%.

PART FIVE

5. VOTING TRENDS OF BY MAIL VOTING; CONDITIONAL VOTING AND VOTING OF PERSONS WITH SPECIAL NEEDS (SNV)

A special space in this analysis is also dedicated to by mail voting (before the Election Day); conditional voting and voting of persons with special needs (on Election Day).

5.1. By mail voting

The data in the table below shows an increase in interest in by mail voting starting from Local elections 2013. If we refer to the percentage of voters who registered for voting by mail, the data shows that this percentage was the highest in Local elections 2009. But, if we talk about the number of voters registered for voting by mail and then how many of them sent the ballot, we can say that in Assembly Elections 2021 we have record number of registred who sent the ballot by mail.

5.2. Conditional voting in Assembly Elections and Local elections

Table 119: Number of registered voters for by mail voting **and number of those who voted by mail**

Conditional voting is a legal option in the Assembly Elections of Kosovo and in the Local Elections. This voting also includes the voting of persons with special needs and circumstances (SNV), which includes persons with disabilities, hospitalized persons, persons in correctional institutions and persons confined at home. Voters from the SNV category are registered in advance during a period determined by the CEC.

Conditional voting trends show vote differences from dual polling stations with those of the SNV category. Within the category of conditional voting in dual polling stations, an increasing trend can be observed in the Kosovo Assembly Elections, while a decrease in these votes for Local Elections. On the other hand, in the SNV category, there is a trend of increasing these votes in the Local Elections, while decreasing for the Kosovo Assembly Elections. In general, the percentage of conditional votes has decreased relative to the total number of voters on the voter list.

Table 120: Number of conditional votes from double polling stations and votes of persons with special needs

	The total number of conditional votes	Number of conditional votes from double polling stations	Number of conditional votes from Special Needs Voting (SNV)
2009 – ELECTIONS LOCAL	26,959	25,420	1,539
2010 – ASSEMBLY ELECTIONS	31,489	28,487	3,002

2021 – LOCAL ELECTIONS	15,883	13,343	2,540

Graph 36: Percentage of conditional votes by type
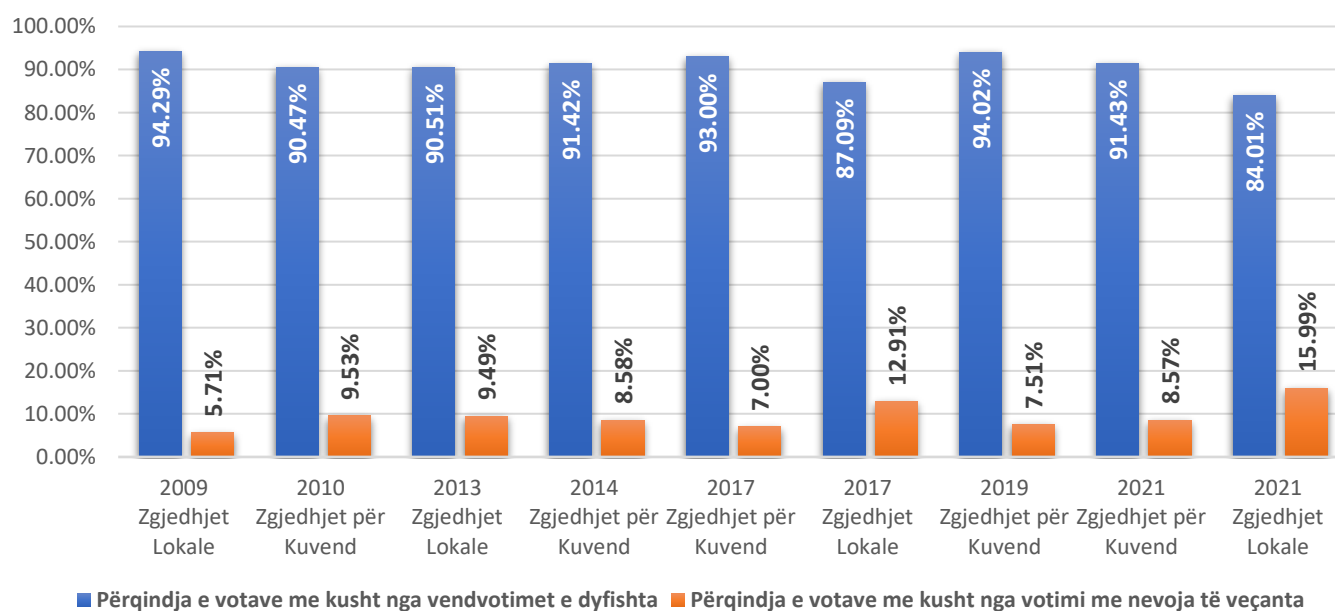

The number of conditional votes is always greater in Assembly Elections as the Republic of Kosovo is a single electoral zone and allows conditional voting for one voter in each polling station, while in Local Elections this is an option only within the municipality where the voter is registered, as each municipality is a separate electoral zone.

Table 121: Nu The number of confirmed and rejected conditional votes

	Total number of conditional votes	Number of confirmed conditional votes	Number of rejected conditional votes

According to the data of confirmed conditional votes (which are included in the final results), according to age groups, from the Kosovo Assembly Elections, show that the 26-40 year old age group uses the right to vote conditionally the most, followed by the age group 41-64 years old and then by the age group 22-25 years old. Conditional voting is the least expressed in the age group 18-21 years old and in the other age group 65-99 years old.

5.3. Voting of Persons with Special Needs in the Assembly Elections and Local Elections

Voting of these voters, who due to specific circumstances cannot go to the polling station on the day of the elections, is made possible through mobile teams, which on the day of the elections go to certain addresses of these voters. In order to vote in this way, voters with special needs must apply for this service, within the deadline set by the CEC. Voters with special needs and circumstances are divided into 3 categories[11].

The trends of voting with needs and special circumstances show a marked decrease in the application for this service after the Elections for the Assembly of Kosovo 2010. A noticeable decrease is observed especially in application for the third category, which was used less and less in the last elections.
The following table shows that there are fewer applications for this service for Local Elections than for the Kosovo Assembly Elections.

Table 125: Number of applications for registration for voting through mobile teams, by SNVs categories

	Local elections 2009	Assembly Elections 2010	Local elections 2013	Assembly Elections 2014	Assembly Elections 2017	Local elections 2017	Assembly Elections 2019	Assembly Elections 2021	Local elections 2021
category I	1,541	2,162	1,445	1,347	1,272	1,581	1,315	1,542	1,835
category II	4,889	5,014	885	1,465	1,172	1,259	1,470	1,348	1,980
category III	1,254	810	0	8	10	0	0	0	28
TOTAL	7,684	7,986	2,330	2,820	2,454	2,840	2,785	2,890	3,843

The data reflected in the following table, which were compiled after the election day, show that not all citizens who register to vote through mobile teams vote in this way, on election day. The highest percentage of participation through mobile teams was recorded in the elections held in 2021.

Table 126: Number of applications for registration for voting through mobile teams and % of their participation in voting
